help make it better.  
Oven & Cooktop Repair  
Winner of the 2023 Emily Toth Award for Best Single Work in Women's Studies “ All-Electric ” Narratives is the first in-depth study of time-saving electrical appliances in American literature. It examines the literary depiction of refrigerators, vacuum cleaners, oven ranges, washing

machines, dryers, dishwashers, toasters, blenders, standing and hand-held mixers, and microwave ovens between 1945, when the “ all-electric ” home came to be associated with the nation's hard-won victory, and 2020, as contemporary writers consider the enduring material and spiritual effects of these objects in the 21st century. The

appropriation and subversion of the rhetoric of domestic electrification and time-saving comprises a crucial, but overlooked, element in 20th-century literary forms and genres including Beat literature, Black American literature, second-wave feminist fiction, science fiction, and postmodernist fiction. Through close-readings of dozens of literary texts alongside print

---

<p>and television ads from this period, Dini shows how U.S. writers have unearthed the paradoxes inherent to claims of appliances' capacity to "give back" time to their user, transport them into a technologically-progressive future, or "return" them to some pastoral past. In so doing, she reveals literary appliances' role in raising questions about gender norms and sexuality,</p>	<p>racial exclusion and erasure, class anxieties, the ramifications of mechanization, the perils and possibilities of conformity, the limitations of patriotism, and the inevitable fallacy of utopian thinking while both shaping and radically disrupting the literary forms in which they operated. American Urban History, Urban History Association (Co-winner) 2023 Honorable Mention, Best Book in the Humanities, Latin American Studies Association Mexico Section Many visitors to Mexico City 's 1886 Electricity Exposition were amazed by their experience of the event, which included magnetic devices, electronic printers, and a banquet of light. It was both technological spectacle and political

---

<p>messaging, for speeches at the event lauded President Porfirio Díaz and bound such progress to his vision of a modern order. Diana J. Montaño explores the role of electricity in Mexico's economic and political evolution, as the coal-deficient country pioneered large-scale hydroelectricity and sought to face the world as a scientifically enlightened "empire of peace." She is</p>	<p>especially concerned with electrification at the social level. Ordinary electricity users were also agents and sites of change. Montaño documents inventions and adaptations that served local needs while fostering new ideas of time and space, body and self, the national and the foreign. Electricity also colored issues of gender, race, and class in ways specific to Mexico. Complicating historical discourses in which Latin</p>	<p>Americans merely use technologies developed elsewhere, Electrifying Mexico emphasizes a particular national culture of scientific progress and its contributions to a uniquely Mexican modernist political subjectivity.</p>
