As editor Kenneth E. Hendrickson, III, notes in his introduction: " Since the end of the nineteenth-century, industrialization has become a global phenomenon. After the relative completion of the advanced industrial economies of the West after 1945, patterns of rapid economic change invaded societies beyond western Europe, North America, the Commonwealth, and Japan." In *The Encyclopedia of the Industrial Revolution in World History* contributors survey the Industrial Revolution as a world historical phenomenon rather than through the traditional lens of a development largely restricted to Western society. The *Encyclopedia of the Industrial Revolution in World History* is a three-volume work of over 1,000 entries on the rise and spread of the Industrial Revolution across the world. Entries comprise accessible but scholarly explorations of topics from the " aerospace industry " to " zaibatsu. " Contributor articles not only address topics of technology and technical innovation but emphasize the individual human and social experience of industrialization. Entries include generous selections of biographical figures and human communities, with articles on entrepreneurs, working men and women, families, and organizations. They also cover legal developments, disasters, and the environmental impact of the Industrial Revolution. Each entry also includes cross-references and a brief list of suggested readings to alert readers to more detailed information. *The Encyclopedia of the Industrial Revolution in World History* includes over 300 illustrations, as well as artfully selected, extended quotations from key primary

sources, from Thomas Malthus ' " Essay on the Principal of Population " to Arthur Young ' s look at Birmingham, England 1791. This work is the perfect reference work for anyone conducting research in the areas of technology, business, economics, and history on a world historical scale. *Sweet's Light Source Catalog File* Wolters Kluwer Law & Business Presents over 112,000 entries with addresses and phone, fax, and toll-free numbers, as well as Web addresses and stock symbols, of businesses, organizations, foundations, agencies, libraries, institutions, military bases, and media outlets.
