This valuable reference presents the "going" royalty rate for virtually any product, including over 1,500 products and services in ten lucrative categories--art, celebrity, character and entertainment, collegiate, corporate, designer, event, sports, nonprofit and music. The essential reference for both beginning and more experienced licensing professionals. Knowing the "going" royalty rate for virtually any product is as simple as reaching for the newly published Licensing Royalty Rates, 2019 Edition . Setting a royalty rate too high can scare away potential licensees, while accepting a lower rate can cost licensors hundreds of thousands of dollars. Licensing Royalty Rates, 2019 Edition provides all the information you need to calculate the right rate every time. The data in Licensing Royalty Rates is compiled using information from the U.S. Patent and Trademark Office. After careful review by a blue-ribbon panel of expert licensing consultants uniquely qualified to know what the appropriate rate range is for specific properties in each licensing category, the information is organized into four time-saving sections that give researchers fast access to comprehensive statistical and analytical data: Royalty rate listing alphabetically by licensed product --provides a detailed alphabetical listing of products and their suggested rate range across all product categories. Royalty rate listing by international trademark class--lets you quickly identify subtle royalty rate differences between similar products within specific international trademark classes. Checklist of licensed products and services--offers a quick-reference to products with a high potential for licensing. Comprehensive list of licensed products and services--presents a detailed list of all surveyed products and services within a trademark class for preparing intent-to-use trademark applications. This detailed information gives both beginning and more experienced licensing professionals the confidence needed to negotiate the maximum allowable rate regardless of the product, the market and the parameters of the specific deal itself. Innovation Trends in Plastics Decoration and Surface Treatment Smithers Rapra
 The plastics industry is a major player for consumer items, notably for the automotive,

consumer electronics and packaging industries, and is necessarily very active in innovation. As a result, moulded thermoplastics are achieving new heights in decorative appearance and quality. Many striking aesthetic effects are possible by employing new polymer blends coupled with a diverse range of decoration and surface treatment technologies. These can produce three-dimensional and tactile finishes, high definition images, flawless high gloss and metallic surfaces, as well as effects ranging from imitation materials, interferential colours, colour gradients, colour change and travel, gloss and matte combinations, and even acoustic or olfactory effects. Manufacturing processes to achieve these include several types of in-mould film, coating or decorating technique, relatively recent technologies to improve surface quality, as well as traditional separate decorating or coating processes such as dry offset; flexographic; inkjet; pad and screen printing; foil transfer; labelling; laser marking; plating; spray coating; and vacuum deposition. This unique book analyses and compares recent trends in each of over 20 types of mainstream manufacturing process and 10 classes of sensory effect they can produce. Supported by over 100 tables, a 3-year sampling of over 1,000 mentioned patent documents and hundreds of commercial developments helps to identify the main trends and their innovators, key innovative clusters and the most sought-after effects, as well as provide indications for the future.

Plunkett's Nanotechnology & MEMS Industry Almanac Visual Reference Publications
 The book’s organization follows a layered approach that builds on basic principles: Light as a Medium (Part 1), Tools of a Lighting Designer (Part 2), Design Fundamentals (Part 3), and Lighting Applications (Part 4). This presents students with a practical and logical sequence when learning basic concepts. The full spectrum of the lighting design process is presented in detail, giving students an example of how one might develop a lighting design from script analysis through concept and plot development, and all the way to an opening. This detailed process with a step-by-step design approach gives students a plan to work from, which they can later modify as they mature and gain confidence as designers. The text contains a more comprehensive discussion of basic technology, light as a physical phenomena, and methodology of designs than is found in most introductory texts, bridging the gap between introductory and advanced lighting courses. The text will appeal to theatrical designers who want to venture into areas of lighting like architectural or virtual lighting design, while at the same time gaining a solid grounding in the fundamentals of lighting design. Lighting Design will also benefit illuminating engineers who want to move away from mere computational approaches in lighting and on to explore techniques along the design approaches of theatrical lighting design. The final 9 chapters cover many specialty areas of lighting design, highlighting the unique and shared qualities that exist between the different aspects of these elements. Discussions involve traditional entertainment areas like theatre, as well as lesser known facets of the industry including film/video, landscape lighting, retail/museum lighting, virtual lighting, concert, spectacle performances, and architectural lighting. Models of design tasks demonstrate the actual use and development of plots/sections, schedules, photometrics tables, and cut sheets, rather than simply talking about what they are. This hands-on approach provides students with a firm understanding of how to actually use these tools and processes.

As companies and organisations increasingly operate across national boundaries, so the incentive to understand how to acquire, deploy and protect IP rights in multiple national jurisdictions has rapidly increased. Transnational Intellectual Property Law meets the need for a book that introduces contemporary intellectual property as it is practiced in today's global context. Focusing on three major IP regimes – the United States, Europe and China – the unique transnational approach of this textbook will help law students and lawyers across the world understand not only how IP operates in different national contexts, but also how to coordinate IP protection across numerous national jurisdictions. International IP treaties are also covered, but in the context of an overall emphasis on transnational coordination of legal rights and strategies.

This product was originally distributed to all federal judges through the Federal Judicial Center. LexisNexis is now the exclusive commercial print publisher to the larger legal market. The Patent Case Management Judicial Guide features: (1) Comprehensive patent law content in single volume covers early case management, preliminary injunctions, discovery, claim construction, pretrial case management, trial and post-trial procedures. Therefore, the content for practicing in highly-technical and expanding area of law is at your fingertips. (2) Glossaries include local patent rules and model patent jury instructions. These are current with model patent jury instructions prepared by National Jury Instruction Project (June 2009). (3) Margin Index to easily locate relevant content Although similar in many respects to other forms of complex civil litigation, patent cases pose distinctive case-management challenges. As the number, size, and complexity of patent cases have grown throughout the United States over the past several decades -- paralleling expansion in the role of high technology enterprises in the U.S. economy -- the need for a comprehensive, user-friendly, and practical judicial guide for managing patent cases has become increasingly apparent. Recognizing this, the authors surveyed the range of approaches and perspectives on patent case management, fostered discussion and analysis of patent case management techniques, and developed this authoritative guide for judges, law clerks, practitioners, and patent and civil procedure professors and scholars. The Patent Case Management Judicial Guide is a collaborative effort between the Federal Judicial Center and the Berkeley Center for Law & Technology of the University of California - Berkeley School of Law.
