The mathematical theory of contact mechanics is a growing field in engineering and scientific computing. This book is intended as a unified and readily accessible source for mathematicians, applied mathematicians, mechanicians, engineers and scientists, as well as advanced students. The first part describes models of the processes involved like friction, heat generation and thermal effects, wear, adhesion and damage. The second part presents many mathematical models of practical interest and demonstrates the close interaction and cross-fertilization between contact mechanics and the theory of variational inequalities. The last part reviews further results, gives many references to current research and discusses open problems and future developments. The book can be read by mechanical engineers interested in applications. In addition, some theorems and their proofs are given as examples for the mathematical tools used in the models.

This instructive book takes you step by step through ways to track, merge, and manage both open source and commercial software projects with Mercurial, using Windows, Mac OS X,

Linux, Solaris, and other systems. Mercurial is the easiest system to learn when it comes to distributed revision control. And it's a very flexible tool that's ideal whether you're a lone programmer working on a small project, or part of a huge team dealing with thousands of files. Mercurial permits a countless variety of development and collaboration methods, and this book offers several concrete suggestions to get you started. This guide will help you: Learn the basics of working with a repository, changesets, and revisions Merge changes from separate repositories Set up Mercurial to work with files on a daily basis, including which ones to track Get examples and tools for setting up various workflow models Manage a project that's making progress on multiple fronts at once Find and fix mistakes by isolating problem sources Use hooks to perform actions automatically in response to repository events Customize the output of Mercurial Mercurial: The Definitive Guide maintains a strong focus on simplicity to help you learn Mercurial quickly and thoroughly.

To Mr. Tate Howard, You are quite possibly the most infuriating, annoying and grumpy man I've ever met in my life. I know you think that you're God's gift to women, but I have a secret to let you in on: you're not. You're God's gift to yourself. Get over your wanna-be cool surfer self and grow up. I thought it was time that someone addressed your big head and told you straight to your face that you're not all that. Just because you have an Ivy league education doesn't mean you're the smartest man in the world. In fact, I'm not even sure if you would have

gotten in if you didn't have rich parents. Yes, I went there.

Every woman doesn't want to sleep with you and I'm sure you're not even good in bed. And I'm someone that would know. From, Your Secret Not Admirer

Mercurial: The Definitive Guide John Wiley & Sons

The proposed Directive on waste electrical and electronic equipment envisages a producer responsibility. This means that producers and importers will be made responsible for the collection and recycling of these products once they have reached the end of their life. Similar legislation in the Netherlands has resulted in a collective producer responsibility organisation funded by a disposal fee. The establishment of such collective organisations is encouraged by environmental legislation. However, competition law is critical of such co-operation particularly with regard to the disposal fee that is to be passed on to consumers. This study examines the environmental and competition law applicable to producer responsibility organisations. In this regard, the experiences in the Netherlands and a number of other European countries have been studied. It comes to the conclusion that competition law and environmental law may not pull in the same direction. The study suggests a number of possible solutions for the conflict between environmental and competition law in this field.

About the author: Hans Vedder (1974) graduated from the University of Groningen in 1997. From 1998 to 2001 he worked as a researcher with the Centre for Environmental Law of the University of Amsterdam. Since 2001 he is lecturer in European law with the University of Groningen. He has published several articles and chapters in books on various aspects of competition and environmental law.

Twenty-five years ago, the Cuyahoga River in Ohio was so contaminated that it caught fire, air pollution in some cities was

thick enough to taste, and environmental laws focused on the obvious enemy: large American factories with belching smokestacks and pipes gushing wastes. Federal legislation has succeeded in providing cleaner air and water, but we now confront a different set of environmental problems--less visible and more subtle. This important book offers thought-provoking ideas on how America can respond to changing public health and ecological risks and create sound environmental policy for the future. The innovative thinkers of the Next Generation Project of the Yale Center for Environmental Law and Policy--experts from business, government, nongovernmental organizations, and academia--propose reforms that balance environmental efforts with other public needs and issues. They call for new foundations for environmental law and policy, adoption of a more diverse set of policy tools and strategies (economic incentives, ecolabels), and new connections between critical sectors (agriculture, energy, transportation, service providers) and environmental policy. Future progress must involve not only officials from the U.S. Environmental Protection Agency and state environmental protection departments, say the authors, but also decision-makers as diverse as mayors, farmers, energy company executives, and delivery route planners. To be effective, next-generation policy-making will view environmental challenges comprehensively, connect academic theory with practical policy, and bridge the gaps that have caused recent policy debates to break down in rancor. This book begins the process of accomplishing these challenging goals.

"A sweet, sexy read, featuring a couple that feels both true-to-life and aspirational. " Kirkus Review, Starred Review American Angie Donovan has never wanted much. When you grow up getting bounced from foster home to foster home, you learn not to become attached to anything, anyone, or any place. But it only took her two days to fall in love with Australia. With her visa clock ticking, surely she can fall in love with an Australian—and get hitched—in two months. Especially if he ’ s as hot and funny as her next-door neighbor... Jace Walters has never wanted much—except a bathroom he didn ’ t have to share. The last cookie all to himself. And solitude. But when you grow up in a family of seven, you can kiss those things goodbye. He ’ s

finally living alone and working on his syndicated comic strip in privacy. Sure, his American neighbor is distractingly sexy and annoyingly nosy, but she ’ ll be gone in a few months... Except now she ’ s determined to find her perfect match by checking out every eligible male in the town, and her choices are even more distracting. So why does it suddenly feel like he—and his obnoxious tight-knit family, and even these two wayward dogs—could be exactly what she needs? Each book in the Patterson's Bluff series is

In order to really see the forest, what's the best way to count the trees? Understanding how the economy interacts with the environment has important implications for policy, regulatory, and business decisions. How should our national economic accounts recognize the increasing interest in and importance of the environment? Nature's Numbers responds to concerns about how the United States should make these measurements. The book recommends how to incorporate environmental and other non-market measures into the nation's income and product accounts. The panel explores alternative approaches to environmental accounting, including those used in other countries, and addresses thorny issues such as how to measure the stocks of natural resources and how to value non-market activities and assets.

Specific applications to subsoil minerals, forests, and clean air show how the general principles can be applied. The analysis and insights provided in this book will be of interest to economists, policymakers, environmental advocates, economics faculty, businesses based on natural resources, and managers concerned with the role of the environment in our economic affairs.

Wanted: Company Daughters. Virtuous young ladies to become the brides of industrious settlers in a foreign land. The Company will pay the cost of the lady ’ s dowry and travel. Returns not permitted, orphans preferred. Amsterdam, 1620. Jana Beil has learned that life rarely provides moments of joy. Having run away from a violent father, her days are spent searching for work in an effort to stay out of the city brothels, where desperate women trade their bodies for a mouthful of bread. But when Jana is hired as a servant for the wealthy and kind Master Reynst and his beautiful daughter Sontje, Jana ’ s future begins to look brighter. Then Master Reynst loses his fortune on a bad investment, and everything changes. The house is sold to creditors, leaving Jana back on the street and Sontje without a future. With no other choice, Jana and Sontje are forced to sign with the East India Company as Company Daughters: sailing to a colonial Dutch outpost to become the brides of male settlers they know nothing about. With fear in their hearts, the girls begin their journey — but what awaits them on the other side of the world is nothing like what they ’ ve been promised... Based on true history, this is a gripping and unputdownable historical novel, perfect for fans of Girl with a Pearl Earring, The Miniaturist and The Indigo Girl. What readers are saying about The Company Daughters: ‘ Blew my mind... a book I've told so many people about purely because I'm still in disbelief that it exists, that it's so magically written and most of all that it is based on true events... a hard-hitting, soul-crushing book of a woman's struggle to survive... I loved every moment of it. Breathlessly, and in a way that took up my entire brain... immersive, heart-wrenching, and I feel emotional writing this review. ’ Goodreads reviewer, 5 stars
‘ From the moment I started reading The Company Daughters, I was captivated by this historical tale. Although it does contain a love story, it's not a romance... This was a gripping read. ’ Goodreads reviewer
‘ This book is so stunningly tender and beautiful, all mixed in with some seriously tragic and heart-wrenching events... Rajaram is an extremely skilled writer, and I love her writing style... The themes of sisterhood and female love were so present in this book and I found it very moving. ’ Goodreads reviewer
‘ I was enchanted by this book! It ’ s a delightful read that will have your emotions all over the place. ’ Goodreads reviewer
‘ I love historical fiction, and this book touched on a topic and time I knew nearly nothing about... There ’ s love, there ’ s loss, there ’ s surviving, there ’ s thriving... It was a very beautiful book. ’ Goodreads reviewer
‘ The Company Daughters is a beautifully written love story... a perfect example of the power of human will and the endurance and hope that love can give a person. ’ Goodreads reviewer, 5 stars
‘ This book has a beauty and grace to it. The author ’ s writing just flows off the page, and although there are struggles and upsets by the time you close the book over you are filled with a warm glow. ’ Goodreads reviewer
