Making adjustments to GEC CDG36 (or CDG31) relays ...

Does anyone have a manual for the GEC CDG36 (or CDG31 Relay) that they could link me to? We have several relays that have shown up as not quite following the curves and need some tweaking. I remember having some literature a long time ago of which screw to adjust to alter which setting (moving magnets across the disc etc), but I can't find it any longer. I have tried the Alsthom and Schneider ...

gec cdg relay manual - Free Textbook PDF

Type CDG 21 relay is a single pole type CDG 11 relay with a high-set instantaneous unit. Type CDG 31 is a triple pole version of the type CDG 11 with three overcurrent units or two overcurrent units and one earthfault unit in the centre. Type CDG 61 relay is a triple pole version of type CDG 21 relay.

Type CDG 11 Overcurrent and Earthfault Relay

CAG14 relay is applied for high impedance restricted earth fault protection of generator, transformer, reactor and bus bars. It is also used with a follower timer for time delayed earth fault protection. Other applications include capacitor bank unbalance protection, generator inter turn fault protection etc.
