Master the GED Test: The GED Test Basics Peterson's

Reviews topics on the 2014 GED Mathematical Reasoning test, provides test-taking strategies, and includes two full-length practice examinations with answers and explanations.

How to Prepare for the GED Test with CD-ROM, 2nd Edition Rowman & Littlefield

The 2014 GED exam has been revised extensively to reflect the world we live in today. The most noticeable change is that the test is now computer based—a transition that requires test-takers to have strong typing and computer skills. The new exam covers additional topics in the Math and Science sections and includes “blended” subject matter within the sections, meaning test-takers will see science questions that require math to produce a numerical answer or social studies questions that require essay-writing skills and so forth. Test-takers will also find all question types used on the new computer format. With such comprehensive changes in store for test-takers, it is fitting for Barron’s to offer a book based on the 2014 exam. The new How to Prepare for the GED® Test offers test-takers a guided approach to taking and passing the exam by building on the skills they

already have. Test-takers will benefit from the book’s extensive subject reviews that cover all four of the new test sections: Social Studies Science Reasoning through Language Arts Mathematical Reasoning The book also includes diagnostic tests and two full-length practice exams with all questions answered and explained. The included CD-ROM offers 2 additional practice tests that simulate the actual testing situation. System Requirements: The program will run on a PC with: Windows® Intel® Pentium II 450 MHz or faster 128MB of RAM 1024 X 768 display resolution Windows 2000, XP, Vista CD-ROM Player The program will run on a Macintosh® with: PowerPC® G3 500 MHz or faster 128MB of RAM 1024 X 768 display resolution Mac OS X v.10.1 through 10.4 CD-ROM Player Browser with Adobe® Flash® Player installed TEXES Social Studies 7-12 (232) Book + Online Accepted, Incorporated Provides practice exams with answers and explanations, and includes reviews of all test areas from writing skills to science.

Barron's Educational Series

This book is about doing what's right for public education in the United States in this age of intensive curriculum convergence, planned instructional standardization, and oppressive accountability procedures. Information is presented about why and how educators, parents, students, community members, and policy-makers have decided to protest against current state and federal educational policies and procedures. The practical experiences of parents, teachers, principals, school superintendents, school board members, and professors are analyzed in chapters of this book. Their first-hand experiences with the various components of the current reform movement are poignantly presented. Through their voices the frustrations with the serious flaws associated with this reform agenda are passionately and logically articulated. They comprehensively explain their personal and professional motivations for organizing and fomenting a rethinking in school reform implementation procedures and they advocate their "smarter approach" to school reforms in our country. The book includes key references that elucidate the need to seriously re-think the directions and strategies of contemporary

schooling in order to maintain enlightened creative instruction based on exciting student-centered curriculum experiences and professional educational judgments.
