Are you concerned about the state of our planet and hope that governments and corporations will find a sustainable way for us to live? If you do not think about it too hard, that may work, but will it? Left on their own, with drivers of popularity and profits, I am not too convinced that it will. The missing part of this equation is you and me. Individuals who believe that corporations and governments can do better. Individuals who believe that through action, we can buy a bit more time to develop and implement solutions to our critical issues. Did I hear a groan out there when you read the word ' actions ' ? Do not worry! Most of the actions that I am referring to will not only help save the planet,

but will benefit you right away through saving money, time, better health, and having a happier life in general.

Sustainability goes beyond controlling our consumption and pollution. There are key social, political, and economic areas that need to be addressed as well, and there are several steps that individuals can take to help in these areas. For those of you who feel we could do more, this book is for you and is loaded with actionable activities, the reasons for doing them, and explores why we are not doing them already. Every journey starts with a first step. Hopefully this book will lead to those first sustainable steps and that will change the world.

New York magazine was born in 1968 after a run as an insert of the New York Herald Tribune and quickly made a place for itself as the trusted resource for readers across the country. With award-winning writing and photography covering everything from politics and food to theater and fashion, the magazine's consistent mission has been to reflect back to its audience the energy and excitement of the city itself, while celebrating New York as both a place and

an idea.
