Genetics: Punnett
Squares Practice Packet
Bio Honors Most genetic
traits have a stronger,
dominant allele and a
weaker, recessive allele.

In an individual with a heterozygous genotype, the dominant allele shows up in the offspring and the recessive allele gets covered up and doesn't show; we call this complete dominance.

a. Draw Punnett squares for each couple (you may need to do more than 1 square/ couple) Baby 2 MUST belong to the Browns because Mr. Brown is the only parent with an A allele to contribute... then the rest works out as follows: b. To which parents does baby #1 belong? Why? Hint you may want to refer to your Punnett squares.

That's a punnett. Apparently, in some countries, they call it a punnett. I think England's one of them, and you UK viewers can correct me if I'm wrong. And so I guess that's where the inspiration comes for calling these Punnett squares, that these are kind of these little green baskets that you can throw different combinations

of genotypes in.
