Research Paper Topics

Genetics is a branch of biology concerned with the study of genes, genetic variation,

and heredity in organisms.. Though heredity had been observed for millennia, Gregor

Mendel, a scientist and Augustinian friar working in the 19th century, was the first to

study genetics scientifically. Mendel studied "trait inheritance", patterns in the way traits

are handed down from parents to offspring.

Biotechnology Research Paper Topics - iResearchNet

Genetics concerns the scientific study of inheritance and variations in living organisms.

While it has long been known that "ancestors" passed on certain traits to their

"offspring," from around the mid-nineteenth century it became evident that organisms

inherit these traits via distinct units, now known as genes.
