help people live longer? What makes a stock's price go up? Why did you get the flu? Causal questions like these arise on a regular basis, but most people likely have not thought deeply about how to answer them. This book helps you think about causality in a structured way: What

---

is a cause, what are causes good for, and what is compelling evidence of causality? Author Samantha Kleinberg shows you how to develop a set of tools for thinking more critically about causes. You'll learn how to question claims, identify causes, make decisions based on causal information, and verify causes through further tests. Whether it's figuring out what data you need, or understanding that the way you collect and prepare data affects the conclusions you can draw from it, Why will help you sharpen your causal inference skills.

"George Varghese has had a remarkable impact on the real world of networking with his algorithmic

innovations over many years. The networking research and development community is fortunate that he has now distilled his knowledge in this very readable, insightful, and much-needed book."

--Bruce Davie, Cisco  
Fellow, Cisco Systems

"This book nicely describes implementation tricks for building fast networking stacks, particularly in routers. This is a much needed book, I don't know of any other that covers this sort of implementation advice. George Varghese has invented several techniques to help speed up the Internet and in his book he provides interesting insight into this, and much more." --Radia Perlman,

Distinguished Engineer,  
Sun Microsystems In designing a network device, you make dozens of decisions that affect the speed with which it will perform-sometimes for better, but sometimes for

---

worse. Network  
Algorithmics provides a complete, coherent methodology for maximizing speed while meeting your other design goals. Author George Varghese begins by laying out the implementation bottlenecks that are most often encountered at four disparate levels of implementation: protocol, OS, hardware, and architecture. He then derives 15 solid principles-ranging from the commonly recognized to the groundbreaking-that are key to breaking these bottlenecks. The rest of the book is devoted to a systematic application of these principles to bottlenecks found specifically in endnodes, interconnect devices, and specialty functions such as security and measurement that can be located anywhere along the network. This immensely practical, clearly presented

information will benefit anyone involved with network implementation, as well as students who have made this work their goal. Features Addresses the bottlenecks found in all kinds of network devices, (data copying, control transfer, demultiplexing, timers, and more) and offers ways to break them Presents techniques suitable specifically for endnodes, including Web servers Presents techniques suitable specifically for interconnect devices, including routers, bridges, and gateways Written as a practical guide for implementers but full of valuable insights for students, teachers, and researchers Includes end-of-chapter summaries and exercises (with solutions and lecture slides available online) [Windows XP Tips & Tricks](#) Krause Publications Science fiction and fantasy is one of the most

---

challenging--and rewarding!--genres in the bookstore. But with New York Times bestselling author Philip Athans and fantasy giant R. A. Salvatore at your side, you'll create worlds that draw your readers in--and keep them reading! Just as important, you'll learn how to prepare your work for today's market. Drawing on his years of experience as one of the most acclaimed professionals in publishing, Wizards of the Coast editor Athans explains how to set your novel apart--and break into this lucrative field. From devising clever plots and building complex characters to inventing original technologies and crafting alien civilizations, Athans gives you the techniques you need to write strong, saleable narratives. Plus! Athans applies all of these critical lessons together in an unprecedented deconstruction of a never-before-published tale by the one and only R. A. Salvatore! There are books on writing

science fiction and fantasy, and then there's this book--the only one you need to create strange, wonderful worlds for your own universe of readers!

The Descendants Complete Series (Books 1, 1.5, 2, 3)

Simon and Schuster

To Mr. Tate Howard, You are quite possibly the most infuriating, annoying and grumpy man I've ever met in my life. I know you think that you're God's gift to women, but I have a secret to let you in on: you're not. You're God's gift to yourself. Get over your wanna-be cool surfer self and grow up. I thought it was time that someone addressed your big head and told you straight to your face that you're not all that. Just because you have an Ivy league education doesn't mean you're the smartest man in the world.

---

In fact, I'm not even sure if you would have gotten in if you didn't have rich parents. Yes, I went there. Every woman doesn't want to sleep with you and I'm sure you're not even good in bed. And I'm someone that would know. From, *Your Secret Not Admirer* [Absolute Beginner's Guide to Building Robots](#) Becca Jameson Publishing

This book bridges the gap between ecotoxicology and limnology, offering an ecotoxicological perspective on lake management. The text describes eutrophication of shallow, temperate lakes, and examines the influence of toxic substances on the aquatic ecosystem, and proposes that nutrients like phosphorus are not the only important factor in explaining and managing eutrophication. Draws on a range of studies and experiments, some presented here for the first time. *Manufacturing Technology* Que Publishing  
A lavishly illustrated, full-color

companion to Scott Westerfeld's New York Times bestselling Leviathan trilogy. A must-have for any fan of Scott Westerfeld's Leviathan trilogy, *The Manual of Aeronautics* is an illustrated guide to the inner workings of the Darwinist and Clanker powers. Loaded with detailed descriptions and elaborate, four-color illustrations of Darwinist beasties and Clanker walkers, weapons, transport, and uniforms, this manual highlights the international powers that Deryn and Alek encounter throughout their around-the-world adventures. This guide draws back the curtain and reveals the inner depths of Westerfeld's fascinating alternative world. *My Sister's Keeper* L.D. Hall  
*A Discovery of Witches* meets *Twilight* in this mesmerizing paranormal romance... Naomi Feldman has never understood the strange energy that hums beneath her senses. But when she comes across an ancient artifact that seems to beckon to her, she may finally find the answers she's been seeking. Alaric, a centuries-old vampire, lives a solitary life by choice. When he's assigned to

---

protect Naomi, long dormant emotions stir to life. Pursued by a dangerous enemy and battling their growing attraction, Naomi and Alaric follow the mystery of the artifact from the museums of Athens, the streets of London, toward a confrontation that will decide the fate of two worlds... Fans of Charlaine Harris, Deborah Harkness, and Karen Marie Moning will love the Descendants series, where urban fantasy and paranormal romance collide. For a limited time, grab your copy of this series bundle deal at a discount compared to purchasing the individual books.

### The Practical Guide to Corporate Social Responsibility Entangled: Amara

More than 150 spinal radiology cases deliver the best board review possible Part of McGraw-Hill Education's Radiology Case Review Series, this unique resource challenges you to look at a group of images,

determine the diagnosis, answer related questions, and gauge your knowledge by reviewing the answer. It all adds up to the best case-based review of spinal imaging available--one that's ideal for certification or recertification, or as an incomparable clinical refresher. Distinguished by a cohesive 2-page design, each volume in this series is filled with cases, annotated images, questions & answers, pearls, and relevant literature references that will efficiently prepare you for virtually any exam topic. The more than 150 cases cover clinically relevant disorders such as neck and back pain, leg numbness, fibrous dysplasia, Sprengel's deformity, neck mass, spina bifida, and lumbar fusion. Radiology Case Review Series Features More than 150 cases for each volume, which consist of:

---

of acquiring organic certification and other business considerations important to a profitable operation. Discover the rewarding satisfaction of running a successful and sustainable organic farm. *Facilitator's Guide to Failure Is Not an Option®* Springer Science & Business Media

Although fiction writers must concern themselves with "big picture" issues such as plot, theme, and character development, much of the day-to-day work of writing involves finding answers to seemingly minor questions: How should I describe the exterior of a house? How can I construct the voice of a historical narrator with authenticity? How should I depict a physically atypical character? Few books on the market address the problems and opportunities present in these and other questions, yet

they are the ones that most writers grapple with on a daily basis. *Danger on the Page: A Fiction Writer's Guide to Sex, Violence, Dead Narrators, and Other Challenges* identifies and explores some of the more common and intractable situational challenges of fiction writing, with chapters grouped into the general subject areas such as scenes, characters, points of view, and settings. Shawver delves into the pitfalls and opportunities of writing about sex, violence, sports, and love; he examines writing from the perspective of a different race, gender, or species; he interrogates conventional beliefs about the use of brand names, the description of architecture, and the portrayal of nature. Throughout, he gives dozens of examples from both literary and commercial fiction so readers

---

can borrow (or reject) other writers' techniques and explore the myriad challenges of fiction writing on their own. A lively and witty approach to a diverse range of specific writing issues, Shawver's book will appeal especially to intermediate-level writers seeking to bring their craft to the next level.

Radiology Case Review Series:

Spine Apres

This proceedings volume provides a fresh perspective on current challenges in cooperation and competition in the age of Industry 4.0.

Featuring selected papers from the 10th Conference on Management of Organizations ' Development (MOD) held in Zamek Gniew, Poland, this volume extends the knowledge of cooperation and competition, presents analytic tools used in the research, considers the potential impact of Industry 4.0 on

collaboration, and provides recommendations for managerial practice.

Interorganizational relations have been a relevant topic in the management sciences in recent years. Globalization, social, cultural, and technological progress are among the factors shaping the environment for collaboration, determining the conditions for development and defining a set of new challenges that managers have to face in today's knowledge-based economy. This book, therefore, explores emerging problems of organizational development in the light of the needs and challenges of Industry 4.0.

Combining the latest theory and practice, the volume provides a realistic outlook on the network economy and interdependencies both within and between sectors.

describes how DFSMStvs works, how and when you might use it, and what you need to consider in your plans. This book should be of interest to you if you want to understand how you can increase the service hours of a CICS/VSAM system by reducing or eliminating the batch window, or if you want to run multiple concurrent batch jobs updating common VSAM data sets. This book is written for readers who have some knowledge of CICS, VSAM, and VSAM Record Level Sharing, and who wish to understand more about DFSMStvs. The book reviews how existing products work. It introduces DFSMStvs, offering more detail on how it works, how you might migrate to it, and how you can change your applications or write new applications to exploit it. This is a companion volume to the DFSMStvs Application Migration Guide, SG24-6972, which contains practical examples of migrating programs to run in a DFSMStvs environment, and the DFSMStvs Presentation Guide, SG24-6973, which contains an overview presentation of DFSMStvs.

"A sweet, sexy read, featuring a couple that feels both true-to-life and aspirational." Kirkus Review, Starred Review  
American Angie Donovan has never wanted much. When you grow up getting bounced from foster home to foster home, you learn not to become attached to anything, anyone, or any place. But it only took her two days to fall in love with Australia. With her visa clock ticking, surely she can fall in love with an Australian—and get hitched—in two months. Especially if he ' s as hot and funny as her next-door neighbor... Jace Walters has never wanted much—except a bathroom he didn ' t have to share. The last cookie all to himself. And solitude. But when you grow up in a family of seven, you can kiss those things goodbye. He ' s finally living alone and working on his syndicated comic strip in

---

privacy. Sure, his American neighbor is distractingly sexy and annoyingly nosy, but she ' ll be gone in a few months... Except now she ' s determined to find her perfect match by checking out every eligible male in the town, and her choices are even more distracting. So why does it suddenly feel like he—and his obnoxious tight-knit family, and even these two wayward dogs—could be exactly what she needs? Each book in the Patterson's Bluff series is

Now with all new content by  
John Ringo! Paradise Lost In  
the future there is no want, no  
war, no disease nor ill-timed  
death. The world is a  
paradise  $\frac{3}{4}$  and then, in a  
moment, it ends. The council  
that controls the Net falls out  
and goes to war. Everywhere  
people who have never

known a moment of want or  
pain are left wondering how  
to survive. But scattered  
across the face of the earth are  
communities which have  
returned to the natural life of  
soil and small farm. In the  
village of Raven's Mill,  
Edmund Talbot, master smith  
and unassuming historian,  
finds that all the problems of  
the world are falling in his lap.  
Refugees are flooding in,  
bandits are roaming the  
woods, and his former lover  
and his only daughter struggle  
through the Fallen landscape.  
Enemies, new and old, gather  
like jackals around a wounded  
lion. But what the jackals do  
not know is that while old he  
may be, this lion is far from  
death. And hidden in the past  
is a mystery that has waited  
until this time to be revealed.  
You cross Edmund Talbot at  
your peril, for a smith is not  
all he once was. . . . At the
