AKASHVANI

International interdisciplinary journal discussing the relations between Society and Space. Space is broadly conceived: from landscapes of the body to global geographies; from cyberspace to old growth forests; as metaphorical and material; as theoretical construct and empirical fact. Covers both practical politics and the abstractions of social theory.

Supplementary Papers Collins Educational Canadian Geography: A Scholarly Bibliography is a compendium of published works on geographical studies of Canada and its various provinces. It includes works on geographical studies of Canada as a whole, on multiple provinces, and on individual provinces. Works covered include books, monographs, atlases, book chapters, scholarly articles, dissertations, and theses. The contents are organized first by region into main chapters, and then each chapter is divided into sections: General Studies, Cultural and Social Geography, Economic Geography, Historical Geography, Physical Geography, Political Geography, and Urban Geography. Each section is further sub-divided into specific topics within each main subject. All known publications on the geographical studies of Canada—in English, French, and other languages—covering all types of geography are included in this bibliography. It is an essential resource for all researchers, students, teachers,

and government officials needing information and references on the varied aspects of the environments and human geographies of Canada.

Working Paper Routledge

The purpose of this extensive annotated bibliography is to assist libraries in the United States, Canada, and other countries to identify, select, and secure publications of value in geography that are appropriate for the purposes and resources of each library collection. More than 2900 entries, published between 1970 and 1984, are arranged by general categories with numerous subdivisions: general aids and sources; history, theory, methodology, and geography; the physical geography; the human geography; applied geography; regional geography; and publications suitable for school libraries. Although publications in other languages have not been excluded, works in English have been emphasized. Basic information provided in each entry includes author, title, place of publication, publisher, publication date, number of pages, identifying numbers, price, Library of Congress card number, and a brief annotation. Where appropriate, translation information including translator and original language are provided. (LH)

Cambridge IGCSE Geography

The 2010s have been a dramatic period for most primary commodity markets. Producers suffered heavily as prices fell in response to new supply facilities going into production, juxtaposed against disappointing demand evolution from China in particular, marking the end of the most powerful and enduring commodity boom since the Second World War. This book is a guide to the primary commodity universe, an increasingly crucial part of the world economy. In this updated edition, Marian Radetzki and Linda Wårell introduce and explain pertinent issues surrounding international commodity markets, including the importance of fossil markets among commodities, price formation, price trends, the shift in primary commodity consumption towards Asia, the increasing reliance on commodity exchanges, new relaxed attitude towards depletion, cartel action, and the revival of nationalism and state ownership. This is an accessible read for graduates, academic researchers, and professionals in the mineral and energy sectors.
