History Alive! Pursuing American Ideals centers on the five founding ideals from the Declaration of Independence: equality, rights, liberty, opportunity, and democracy. Each generation has struggled with these ideals. Some have made little progress toward achieving them. Others have made great progress. This book invites students to become engaged in this struggle, from establishing an American republic to the making of modern America. --Website.

Bring Learning Alive! ESRI Press

Bring Science Alive! is an Integrated program built from the ground up to align to the Next Generation Science Standards (NGSS). Bring Science Alive! embodies the new vision for how science should be taught in schools—focusing on big picture concepts and teaching students how to "do science"—rather than memorize facts. My Place McGraw-Hill Education

Published by OpenStax College, U.S. History covers the breadth of the chronological history of the United States and also provides the necessary depth to ensure the course is manageable for instructors and students alike. U.S. History is

designed to meet the scope and sequence requirements of most courses. The authors introduce key forces and major developments that together form the American experience, with particular attention paid to considering issues of race, class and gender. The text provides a balanced approach to U.S. history, considering the people, events and ideas that have shaped the United States from both the top down (politics, economics, diplomacy) and bottom up (eyewitness accounts, lived experience).

A "week one, day one" kind of teacher's manual with daily geography drills and numerous weekly assignment choices that include: mapping activities, atlas usage, research, notebooking and culture. Daily drills at 3 different levels for versatility and multi-year usage. Students learn to recognize important characteristics and traits of each continent, read and create maps, identify key geographical terms and more. Finish up the year by reading *Around the World in 80 Days*, by Jules Verne. This course lays a solid foundation of world geography for students 2nd grade and up.

History Alive!. Jacaranda

This little book is confined to very simple "reading lessons upon the Form and Motions of the Earth, the Points of the Compass, the Meaning of a Map: Definitions." The shape and motions of the earth are fundamental ideas—however difficult to grasp. Geography should be learned chiefly from maps, and the child should begin the study by learning "the meaning of map," and how to use it. These subjects are well fitted to form an attractive introduction to the study of Geography: some of them should awaken the delightful interest which attaches in a child's mind to that which is wonderful—incomprehensible. The Map lessons should lead to mechanical efforts, equally delightful. It is only when presented to the child for the first time in the form of stale knowledge and foregone conclusions that the facts taught in these lessons appear dry and repulsive to him. An effort is made in the

following pages to treat the subject with the sort of sympathetic interest and freshness which attracts children to a new study. A short summary of the chief points in each reading lesson is given in the form of questions and answers. Easy verses, illustrative of the various subjects, are introduced, in order that the children may connect pleasant poetic fancies with the phenomena upon which "Geography" so much depends. It is hoped that these reading lessons may afford intelligent teaching, even in the hands of a young teacher. The first ideas of Geography—the lessons on "Place"—which should make the child observant of local geography, of the features of his own neighbourhood, its heights and hollows and level lands, its streams and ponds—should be conveyed viva voce. At this stage, a class-book cannot take the place of an intelligent teacher. Children should go through the book twice, and should, after the second reading, be able to answer any of the questions from memory. Charlotte M. Mason

Geography: The Human and Physical World, Student Edition Holt McDougal

When war devastates their country, a boy and his parents are forced to flee to another country far east, where they must live in a small room shared with another couple. Food is scarce. But one day, when father goes to the bazaar to buy bread, he comes home with a map instead. The boy and his mother are furious, they are so hungry! But the map floods their cheerless room with colour. The boy becomes fascinated by it and is transported far away without ever leaving the room. Father was right to buy it, after all.

"Plastic bags don't belong in the sea!" Everybody has a taste for Stanley - and the other ocean creatures just keep mistaking him for a delicious treat - but this is no ordinary jellyfish. Most jellyfish have dangly-gangly tentacles, but Stanley has two handles... Other jellyfish have a magical glow, but Stanley has stripes... Because Stanley (spoiler alert) is a plastic bag! A beautifully illustrated picture book with a powerful message about plastic pollution from environmental expert Sarah Roberts. The perfect gift to introduce children to the issues of plastic in our oceans Brilliant for teachers to read to children in class when introducing them to pollution issues This book is made of material from well-managed FSC-certified forests and other controlled sources

[A Search for the World's Most Creative Places from Ancient Athens to Silicon Valley](#) Teachers Curriculum Institute

Oxford International Primary Geography is a complete six year primary geography course that provides an engaging introduction to the subject. Using real life examples from around the globe, the course covers key aspects of both human and physical geography, from the basics of mapping to more complex topics such as the pros and cons of ecotourism and how to meet the resource needs of the world's growing population. Additional Workbooks provide students with the opportunity for further study in the classroom or at home, including suggested research topics and cross-curricular projects. For the teacher, the Teacher's Guide provides step-by-step guidance for each lesson, as well as background knowledge and geographical information for specialist and non-specialist teachers alike.

This resource book is designed to assist teachers in implementing California's history-social science framework at the 10th grade level. The models support implementation at the local level and may be used to plan topics and select resources for professional development and preservice education. This document provides a link between the framework's course descriptions and teachers' lesson plans by suggesting substantive resources and instructional strategies to be used in conjunction with textbooks and supplementary materials. The resource book is divided into eight units: (1) "Unresolved Problems of the Modern World"; (2) "Connecting with Past Learnings: The Rise of Democratic Ideas"; (3) "The Industrial Revolution"; (4) "The Rise of Imperialism and Colonialism: A Case Study of India"; (5) "World War I and Its Consequences"; (6) "Totalitarianism in the Modern World: Nazi Germany and Stalinist Russia"; (7) "World War II: Its Causes and Consequences"; and (8) "Nationalism in the Contemporary World." Each unit contains references. (EH)

[The Modern World](#) Geography Matters

One small spark brought fire awake Winding like a small black snake Fire flickered, fire crept Flames snickered, bushfire leapt... Inspired by the bushfires that have affected many Australians, Fire is a moving and sensitive story of a natural disaster as seen through the eyes of a cockatoo. The fire mercilessly engulfs homes and land, leaving a path of destruction. But from the ruins, courage, kindness and new life grows. A beautiful and timely expression of the strength of the Australian spirit during times of adversity.
