NTA UGC NET/JRF/SET Paper II Geography 28 Solved Papers (2012–2021) Disha Publications

Geography and Geographers continues to be the most comprehensive and up-to-date overview of human geography available. It provides a survey of the major debates, key thinkers and schools of thought in the English-speaking world, setting them within the context of economic, social, cultural, political and intellectual changes. It is essential reading for all undergraduate geography students. It draws on a wide reading of the geographical literature and addresses the ways geography and its history are understood and the debates among geographers regarding what the discipline should study and how. This extensively updated seventh edition offers a thoroughly contemporary perspective on human geography for new and more experienced students alike.

Geography and Geographers Leckie & Leckie
A valuable collection of papers by eminent explorers and scientists, compiled for the benefit of the 1875 British Arctic Expedition.

The Collected Papers of Henry Bradley Disha Publications
Ellen Semple's 'Influences of Geographic Environment' (1911) - a treatise on what would later be called environmental determinism - coincided with the emergence of geography as an independent academic discipline in North America and Britain. Highly controversial and written by one of America's first female professional geographers, it was considered by some a monument to Semple's scholarship and erudition, whilst for others it was conceptually flawed. And yet its influence on the development and direction of the new discipline of geography was profound. Innes Keighren explains why 'Influences' was encountered differently by different people, at different times and in different places, and reveals why the book aroused the passions it did. The result is a pioneering work that provides a wholesale re-visioning of the way in which geographical knowledge is disseminated.

Arihant CBSE Term 1 Geography Sample Papers Questions for Class 12 MCQ Books for 2021 (As Per CBSE Sample Papers issued on 2 Sep 2021) Disha Publications
This volume seeks to provide a sense of purpose and order to the study of political geography. The editors devise a conceptual structure for the field, bringing political geography into line with trends in contemporary geography as a whole and with other social sciences. Not only do the selections contain a wide variety of contributions from other fields, but the introductory essays and annotated bibliographies suggest related research. The structure of the book enjoys close parallels in other social sciences.The organization of the book reflects the editors' definitions and structuring of political geography. Part I, ""Heritage,"" includes works that have contributed to the theoretical development of the field. Part II, ""Structure,"" comprises the concern to which political geographers have devoted most of their past attention. Parts III and IV, ""Process"" and ""Behavior,"" form the subject where much future theoretical and practical effort is needed. Part V, ""Environment,"" provides the context in which spatial structure, process, and behavior occur.The Structure of Political Geography includes selections from sociobiology, history, international relations, political economy, political science, social psychology, and sociology. The classics in the field are an essential inclusion since the book would be incomplete without them. The selections in the volume, originally published in 1971, remain useful and pertinent to political geographers of diverse persuasion and to social scientists interested in geographical approaches. The fact that there is a clear focus and conceptual interdependence in political geography is the volume's greatest contribution.

Environmental Hazards in the British Isles (1981) offers a comprehensive account of the various hazards affecting Britain. Based on a wealth of empirical data, it provides a balanced perspective on phenomena that are usually presented in a sensational way by the media and then quickly forgotten. A three-fold methodology is suggested for the study of environmental hazards, which concentrates on their incidence, their causes and their frequency, and their impact on both the individual and society as a whole.
