An examination of how language functions in CLIL, based on a corpus of classroom interactions. Drawing on their wide experience as CLIL educators and researchers, the authors explore data collected in real CLIL classrooms from two interrelated perspectives: the CLIL classroom as an interactional context for developing language and content, and the genres and registers through which the meanings of the different academic subjects are enacted. From the

analysis of this corpus of data, the authors provide a rich description of how CLIL students' language works and may be expected to develop. Also available separately as a paperback. WJEC GCSE Geography Hodder Education

This collection of papers, originally published in 1981, reviews and evaluates past and possible future advances in a field of central importance to human geography: behavioral geography. The book includes critical studies which show how the approach has contributed substantially to work within four areas of major application in behavioral geography: urban travel behavior, environmental cognition, residential mobility and spatial diffusion. The final section of the book focuses on the shortcomings of the behavioral approach and considers the alternative modes of analysis available.
