globalization are intended to be viewed as two separate concepts. However, as long as the approaches complement each other, considering these paradigms in tandem can have significantly positive effects on the overall status of the world economy. Regional Economy Integration and the Global Financial System addresses recent trends in regional integration projects and the strides that such projects are making on the road toward globalization. Focusing on a range of economic projects, emerging supranational units, and possible implications for future trends, this book is an essential reference source for professionals, scholars, and institutions

interested in the dynamic effects of regionalism and globalization. Economic and financial issues in the post-covid-19 world: Implications and role of public health Zed Books Ltd. Bringing together scholarly but readable essays on the process of gentrification, this two-volume collection addresses the broad question: In what ways does gentrification affect cities, neighborhoods, and the everyday experiences of ordinary people? In this second volume of Gentrification around the World, contributors contemplate different ways

of thinking about gentrification and displacement in the abstract and “on-the-ground.” Chapters examine, among other topics, social class, development, im/migration, housing, race relations, political economy, power dynamics, inequality, displacement, social segregation, homogenization, urban policy, planning, and design. The qualitative methodologies used in each chapter—which emphasize ethnographic, participatory, and visual approaches that interrogate the representation of

---

gentrification in the arts, film, and other mass media—are themselves a unique and pioneering way of studying gentrification and its consequences worldwide.

In finance, understanding investors and their motivations is key for any business and policy-maker. *Understanding the Investor: A Maltese Study of Risk and Behavior in Financial Investment Decisions* offers a nuanced view of the Maltese investor and the Malta Stock Exchange, and its implications on the wider financial world.

*Handbook on the Geographies of Money and Finance* IGI Global

This engaging and topical book comprehensively explores the complexities surrounding the EU Cohesion Policy, which has

been addressing regional and urban development across Europe since the 1980s. Adopting a multidisciplinary approach, it not only considers the goals of this long-term investment policy, which is to reduce territorial disparities between Member States and their regions, but also considers the role it plays in the European integration process and the challenges the EU will face in its future.

Monetary Fund

Addresses a number of critical issues in finance and industrial policy for sustainable economic recovery in Europe in the post-crisis era. Brings together current debates on banking policy, regulation, and reform to reassert the need for financial institutions that will back up and finance an industrial policy to revive the European economy.

**Gentrification around the World, Volume II** Routledge

This key new book synthesises Peter Buckley's work on 'the global factory' – the modern networked multinational enterprise. The role of interfirm

---

networks, entrepreneurship and cooperation in the creation and management of global factories leads to a discussion of their governance, internal knowledge transfer strategies and performance, including their role in potentially combating societal failures. Emerging country multinationals are examined as a special case of global factories with a focus on Indian and Chinese multinationals, their involvement in tax havens and offshore financial centres, the performance and processes of their acquisition strategies – all seen as key aspects of globalisation.

*EU Cohesion Policy* IGI Global Crowdfunding is becoming an

increasingly popular method to finance projects of every kind and scale. This contributed volume is one of the earliest books presenting scientific and research-based perspectives of crowdfunding, its development, and future. The European Crowdfunding Network (ECN) and its scientific work group, together with FGF e.V., invited both researchers and practitioners to contribute to this first state-of-the-art edited volume on crowdfunding in Europe. This book contributes to a better comprehension of crowdfunding, encourages further fundamental research and contributes to a systematization of this new field of research. The book also

features expert contributions by practitioners to enhance and complement the scientific perspective. This book can be used as a guideline and shall advance classification in an emerging research field.

This encyclopedia is the most comprehensive and up-to-date source of reference for sustainability in business and management. It covers both traditional and emerging concepts and terms and is fully international in

---

its scope. More than 700 contributions of internationally renowned experts provide a definitive access to the knowledge in the area of sustainable and responsible management. All actors in the field will find reliable and up to date definitions and explanations of the key terms and concepts of management in this reference work. The Encyclopedia of Sustainable Management represents all aspects of management and business conduct. It takes sustainability as a

management concept that gives due credit to the complexity and diverging constraints in which businesses and corporations act today, and it emphasizes and focuses approaches that help ensure that today's management decisions and actions will be the basis for tomorrow's prosperity.

*Financial Access Under the Microscope* Routledge

In response to the credit crunch during the global financial crisis of 2007–2008, many have called for the re-

establishment of regional banks in the UK and elsewhere. In this context, Germany's regional banking system, with its more than 1,400 small and regional savings banks and cooperative banks, is viewed as a role model in the financing of small and medium-sized enterprises (SMEs). However, in line with the 'death of distance' debate, the universal application of ICT-based scoring and rating systems potentially obviates the necessity for proximity to

---

reduce information asymmetries between banks and SMEs, calling into question the key advantage of regional banks. Utilising novel ethnographic findings from full-time participant observation and interviews, this book presents intimate insights into regional savings banks and compares their SME lending practices with large, nationwide-operating commercial banks in Germany. The ethnographic insights are contextualised by concise description of the three-pillar German banking

system, covering bank regulation, structural and geographical developments, and enterprise finance. Furthermore, the book advances an original theoretical approach that combines classical banking theories with insights from social studies of finance on the (ontological) foundation of new realism. Ethnographic findings reveal varying distances of credit granting depending on the rating results, i.e. large banks allocate considerable credit-granting authority to local

staff and therefore challenge the proximity advantages of regional banks. Nevertheless, by presenting case studies of lending to SMEs, the book demonstrates the ability of regional banks to capitalise on proximity when screening and monitoring financially distressed SMEs and explains why the suggestion that ICT can substitute for proximity in SME lending has to be rejected.

Graham Dunkley challenges the oft-repeated notion that free trade and global integration are the best means of development for all nations at all times – an idea that has proved even more misguided in the wake of the global financial crisis. By contrast, Dunkley reveals – through a wide range of statistical analysis and case studies – that at best the evidence is mixed. Looking systematically at issues such as trade-led growth, supply chains and financialization, *One World Mania* reveals the many problems that over-globalization has caused, often at great human cost. An indispensable guide for anyone wishing to understand the shortcomings of current global economic policies.

*Debates in Geography Education* encourages student and practising teachers to engage with and reflect on key issues, concepts and debates in their specialist subject teaching. It aims to enable geography teachers to reach their own informed judgements and argue their point of view with deeper theoretical knowledge and understanding. Expert editors and contributors provide a balance of experience and perspectives and offer international, historical and policy contexts, evidence informed classroom debates and a glimpse of the subject’s expanding horizons. Debates considered include: what constitutes knowledge in geography? constructing the curriculum; how do we link

---

assessment to making progress in geography? the contribution of fieldwork and outdoor experiences; technology and media; how we use Geographical Information; how geography contributes to ¿global learning¿; sustainable development and geography education. The comprehensive, rigorous coverage of these key issues, together with carefully annotated selected further reading, reflective questions and a range of specific web-based resources, will help

support shape your own research and writing. Debates in Geography Education is a source of knowledge, experience and debate that will be essential reading for all students studying at Masters level, practising teachers who want to develop a better understanding of the issues that shape their practice, and Education Studies students considering in-depth subject teaching.

Successful international

integration has underpinned most experiences of rapid growth, shared prosperity, and reduced poverty. Perhaps no sector of the economy better illustrates the potential benefits--but also the perils--of deeper integration than banking. International banking may contribute to faster growth in two important ways: first, by making available much needed capital, expertise, and new technologies; and second, by enabling risk-sharing and diversification. But international banking is not without risks. The global financial crisis vividly

---

demonstrated how international banks can transmit shocks across the globe. The Global Financial Development Report 2017/2018 brings to bear new evidence on the debate on the benefits and costs of international banks, particularly for developing countries. It provides evidence-based policy guidance on a range of issues that developing countries face. Countries that are open to international banking can benefit from global flows of funds, knowledge, and opportunity, but the regulatory challenges are complex and, at times, daunting. Global

Financial Development Report 2017/2018 is the fourth in a World Bank series. The report also tracks financial systems in more than 200 economies before and during the global financial crisis on an accompanying website ([www.worldbank.org/financialdevelopment](http://www.worldbank.org/financialdevelopment)). \*\*Note: This World Bank report, Global Financial Development Report 2017/2018: Bankers without Borders, is not associated with the Grameen Foundation's Bankers without Borders program, which engages volunteer consultants to donate their expertise to serve social

The same goes for identifying new types of funding schemes and fiscal models prompted by austerity with the reduction in financial resources for local governments. This book offers a broad perspective on some of the organizational and financial

---

problems faced by cities and local governments across Europe and analyses the reactions and reforms implemented to address current economic and public finance conditions. The geographical coverage of the case studies, multidisciplinary background of the contributing authors and focus on a multiplicity of issues and challenges that confront local governments, not just financial issues as is often the case, means this book is relevant to a wide readership. The book is written for post-graduate students, advanced undergraduates, and researchers in the multidisciplinary field of local government studies (Public Administration, Geography, Political Science, Law, Economy

and Sociology), as well as practitioners working in local government institutions. *Microfinance and Financial Inclusion* Routledge

Financialization has become the go-to term for scholars grappling with the growth of finance. This Handbook offers the first comprehensive survey of the scholarship on financialization, connecting finance with changes in politics, technology, culture, society and the economy. It takes stock of the diverse avenues of research that

comprise financialization studies and the contributions they have made to understanding the changes in contemporary societies driven by the rise of finance. The chapters chart the field's evolution from research describing and critiquing the manifestations of financialization towards scholarship that pinpoints the driving forces, mechanisms and boundaries of financialization. Written for researchers and students not only in economics but from across the social sciences and

---

the humanities, this book offers a decidedly global and pluri-disciplinary view on financialization for those who are looking to understand the changing face of finance and its consequences.

*Financial Decision Making and Retirement Security in an Aging World* Edward Elgar Publishing

A growing body of evidence suggests that financial literacy plays an important role in financial well-being, and that differences in financial knowledge

acquired early in life can explain a significant part of financial and more general well-being in adult life.

Financial technology (FinTech) is revolutionizing the financial services industry at an unrivalled pace. Views differ regarding the impact that FinTech is likely to have on personal financial planning, well-being and societal welfare. In an era of mounting student debt, increased (digital) financial inclusion and threats arising from instances of (online) financial fraud,

financial education and enlightened financial advising are appropriate policy interventions that enhance financial and overall well-being. *Financial Literacy and Responsible Finance in the FinTech Era: Capabilities and Challenges* engages in this important academic and policy agenda by presenting a set of seven chapters emanating from four parallel streams of literature related to financial literacy and responsible finance. The chapters in this book were originally published as a

*Representing Place and Territorial Identities in Europe*  
Routledge

This collection considers the financial crisis from a managerial perspective, focussing on the business implications for the financial industry. Topics examined include governance, information needs and strategy of financial intermediaries and investors. The contributions build on the existing literature and present some unique insights on governance, credit quality evaluation and performance measurement. In

a fast growing or steady market, it is possible for even an inefficient financial system to satisfy investors' and firms' needs. However, the current financial crisis has brought into sharp relief the limits of the inefficient practices adopted by the market, and made clear the importance of developing more effective governance mechanisms, more detailed and complete information databases and new strategies. The crisis has also brought to the fore issues about the governance of financial intermediaries that had not been previously addressed. These include board

---

diversity, internal monitoring procedures and the existence of interlocking directorates. More broadly, the financial crisis has radically altered the international framework, with an increasingly consolidated financial sector, and the rise of new markets (such as China) that now play a predominant role in the worldwide market. Studies on the competition and on the performance in this new scenario are essential in order to understand the implications of recent events.

*Neoliberal Urban Policy and the Transformation of the City* Routledge

This book provides insight into the topic of place and territorial identity, which involves both the dimension of collective belonging and the politics of territorial planning and enhancement. It considers the social, economic and political effects of territorial identity representations among others in terms of mystification, spatial fetishism, and the creation of place and territorial stereotypes. A mixed methodology is employed to research case studies at diverse territorial

scales which are relevant to the impact of a variety of factors on place/territorial identity processes such as migration, political and economic changes, natural disasters, land use changes, etc. Visual imagery, constructing visual discourses and living within visual cultures are placed in the foreground and refer to among others the changes and challenges introduced by the Internet and social networks in place/territory representations and self-representations; identity
