Nigerian Geographical Journal Oswaal Books and Learning Private Limited
Perspectives in Curriculum Studies by Margaret Nalova Endeley and Martha Ashuntantang Zama is a comprehensive textbook for graduate students of Curriculum Studies and Instruction, and a guide for education practitioners wherein they articulate contemporary

curriculum concepts, principles and applications in the field. With illustrations from informed African perspectives, the authors situate curriculum theory and practice in local contexts so that African scholars, educators, and others may be equipped with knowledge and skills to develop and maintain appropriate and relevant curricula for quality education. Framed in sixteen chapters, grouped in five parts, the text begins with the exposition of basic terminology, curriculum theory and foundations of the curriculum before delving profoundly into the curriculum development process. The latter portion gives the reader the opportunity to explore, analyse and evaluate different curriculum planning approaches and models, curriculum design dimensions and patterns, and procedures for the development of syllabuses, textbooks, and other curriculum materials. Also, Curriculum implementation tasks as well as strategies for evaluation of programs and courses are presented and discussed. Since curriculum and instruction are highly intertwined notions, instructional design is elaborately treated in two chapters bringing out its theoretical underpinnings and procedures. The book closes with global perspectives of curriculum development in practice. The goal here is to

provide insights into trends, issues, and challenges not only in curriculum development but also in the curriculum field, which should generate action towards the improvement of curriculum practice and spur the search for new knowledge.
The Adventure of Geography Oswaal Books and Learning Private Limited
This book includes the solutions of the questions given in the textbook of Our Earth Comprehensive Geography Part-II Published by Frank EMU and is for March 2022 Examinations.
Education the Work of the People Cambridge University Press
Geography of Claudius Ptolemy, originally titled Geographia and written in the second century, is a depiction of the geography of the Roman Empire at the time. Though inaccurate due to Ptolemy's varying methods of measurement and use of outdated data, Geography of Claudius Ptolemy is nonetheless an excellent example of ancient geographical study and scientific method. This edition contains more than 40 maps and illustrations, reproduced based on Ptolemy's original manuscript. It remains a fascinating read for students of scientific history and Greek influence. CLAUDIUS PTOLEMY (A.D. 90- A.D. 168) was a poet, mathematician, astronomer, astrologer, and geographer who wrote in Greek, though he was a Roman citizen. He is most well-known for three scientific treatises he wrote on astronomy, astrology, and geography, respectively titled Almagest, Apotelesmatika, and

Geographia. His work influenced early Islamic and European studies, which in turn influenced much of the modern world.

Ptolemy died in Alexandria as a member of Greek society.

Self-Help to ICSE Our Earth Comprehensive Geography Part-II Class 10 Oswaal Books and Learning Pvt Ltd

Cambridge IGCSE and O Level Geography has been written specifically for Cambridge International syllabuses 0460 and 2217. Filled with sources, graphs and case studies, the coursebook requires students to examine a range of information, helping to build their analytical skills.

Written by highly experienced authors and Cambridge trainers, this coursebook is updated to support both Cambridge IGCSE and O Level students. It includes clear and practical support, case studies from 25 different countries, fieldwork ideas and a range of interesting content. The accompanying CD-ROM contains support sheets for the topics covered, outline maps and sample exam-style questions. Answers to the activities are in the teacher's resource.
