students must undertake
personal investigative work
based on first-hand and
secondary data. This element
of the exam accounts for
between 16.7 and 20 per cent
of the total mark in the case
of all examining boards.
Fieldwork itself has also
changed in recent years,
moving away from the
traditional fieldwork
day/week attended by the
whole class, to personal

investigation where students
select an enquiry and are
responsible for assessing
methodologies, gathering
data and writing up a report.
This text tackles these areas,
giving particular guidance to
self-study. It explores skills
and techniques, constructing
questionnaires, using
statistical analysis and gives
advice on selecting a title.
Sections relate to all the main
themes of the syllabus.

Demonic possession was a spiritual state that often had physical symptoms; however, in Demonic Possession and Lived Religion in Later Medieval Europe, Sari Katajala-Peltomaa argues that demonic possession was a social phenomenon which should be understood with regard to the community and culture. She focuses on significant case studies from canonization processes (c. 1240-1450) which show how each set of sources formed its own

specific context, in which 'learned' and the 'popular' demonic presence derived within religion, as well as from different motivations, reasonings, and methods of categorization. The chosen perspective is that of lived religion, which is both a thematic approach and a methodology: a focus on rituals, symbols, and gestures, as well as sensitivity to nuances and careful contextualizing of the cases are constitutive elements of the argumentation. The analysis contests the hierarchy between the 'learned' and the 'popular' the existence of a strict polarity between individual and collective religious participation. Demonic presence disclosed negotiations over authority and agency; it shows how the personal affected the communal, and vice versa, and how they were eventually transformed into discourses and institutions of the Church; that is, definitions of the miraculous and the diabolical. Geographically, the volume covers Western Europe, comparing Northern and Southern material and customs. The structure follows the logic of the phenomenon, beginning with the background reasons offered as a cause of demonic possession, continuing with communities' responses and emotions, including construction of sacred caregiving methods. Finally, the ways in which demonic presence contributed to wider societal debates in

the fields of politics and spirituality are discussed. Alterity and inversion of identity, gender, and various forms of corporeality and the interplay between the sacred and diabolical are themes that run all through the volume.

Pertussis, or whooping cough, is a respiratory disease caused primarily by infection with the bacterium *Bordetella pertussis*. It remains among the leading causes of death amongst vaccine-preventable diseases

worldwide and recent years have seen its alarming re-emergence in many regions (including the U.S. and much of Europe), despite sustained high levels of vaccine coverage. The causes of the resurgence remain contentious, in part due to inherent complexities of the pathogen's biology, in part due to pronounced variation in the treatment and prevention strategies

between different countries and regions, and in part due to long-standing disagreement amongst scientific researchers studying pertussis. This edited volume brings together expert knowledge from disparate fields with the overall aim of synthesizing the current understanding of this critically important, global pathogen.

The impact of economic geography both within and beyond the wider field of geography has been constrained in the past by its own limitations. Drawing together the work of several eminent geographers this superb collection assesses the current state of knowledge in the sub discipline and its future direction. In doing so, the contributors show how economic geographers have offered explanations that affect places and lives in the broader context of the global economy. Offering a discussion of

theoretical constructs and methodologies with the purpose to show the need to combine different approaches in understanding spatial (inter) dependencies, contributors also demonstrate the need to engage with multiple audiences, and within this context they proceed to examine how geographers have interfaced with businesses and policy. This excellent collection moves economic geography from a preoccupation with theory towards more rigorous empirical research with greater relevance for public

policy. With excellent breadth of coverage, it provides an outstanding introduction to research topics and approaches. Pertussis Oxford University Press, USA
This book presents an in-depth study of English as spoken in two major anglophone Caribbean territories, Jamaica and Trinidad. Based on data from the International Corpus of English, it focuses on variation at the morphological and syntactic level between the educated standard and more informal

educated spoken usage. Dagmar Deuber combines quantitative analyses across several text categories with qualitative analyses of transcribed text passages that are grounded in interactional sociolinguistics and recent approaches to linguistic style and identity. The discussion is situated in the context of variation in the Caribbean and the wider context of world Englishes, and the sociolinguistic background of Jamaica and Trinidad is also explored. This	volume will be of interest to students and researchers interested in the fields of sociolinguistics, world Englishes, and language contact. <u>Advanced Physics</u> Hodder Education Written by experienced teachers who bring a refreshing approach to traditional A-Level material. Advanced Chemistry will inspire and support chemistry students. Questions give opportunities to practise recall and analytical skills, and 'Maths boxes' give	mathematical support. Key terms are highlighted and there are full colour illustrations.
