A Concise Guide to the Israeli-Palestinian Conflict and the Movement to Boycott Israel Zed Books Ltd.
This book takes Jamie Oliver's campaign for better school meals as a starting point for thinking about morally charged concerns relating to young people's nutrition, health and well-being,

parenting, and public health 'crises' such as obesity. The authors show how these debates are always about the moral project of the self.

In 2009, after decades of conflict, the Sri Lankan government proclaimed the decisive defeat of the Liberation Tamil Tigers of Elam. Subsequently, the state proved resistant to attempts by the UN and other international bodies to promote post-war reconciliation or reform. In this incisive new work, Judith Large investigates the ways in which the Rajapaksa government was able to subvert international diplomatic efforts, as well as exploring the wider context of rising Sinhalese nationalism, the attendant growth of discrimination against minorities, and efforts by both the diaspora and citizens within Sri Lanka to work towards a positive peace. Push Back is vital

reading not only for those interested in Sri Lanka, but also for those concerned about the wider implications of the conflict for human rights, peace-making, and geopolitics.

A decade and a half of exhausting wars, punishing economic setbacks, and fast-rising rivals has called into question America's fundamental position and purpose in world politics. Will the US continue to be the only superpower in the international system? Should it continue advancing the world-shaping grand strategy it has followed since the Cold War? Or should it focus on internal problems? America Abroad takes stock of these debates and provides a powerful defense of American globalism. Since the end of World War Two, world politics has been shaped by two constants: America's position as the most powerful state, and its strategic choice to be deeply engaged in the world. But if America disengages from the world and reduces its footprint overseas, core US security and economic interests would be jeopardized. While America should remain globally engaged, it has to focus primarily on its core interests or run the risk of overextension. A bracing rejoinder to the critics of American globalism—a more potent force than ever in the Trump era—America Abroad is a powerful reminder that a robust American presence is crucial for maintaining world order.

The European Union and the Geopolitics of the Arctic Taylor & Francis

Leading academics from around the world, who specialize in analysing maritime strategic issues, deliberate the impact of the American 'pivot' or 're-balance' strategy, and the 'Air-Sea Battle' operational concept, on the maritime power and posture of a number of selected states. Intending to strengthen US economic, diplomatic, and security engagement throughout the Asia-Pacific, both bilaterally and multilaterally, the re-balance stands out as one of the Obama administration's most far-sighted and ambitious foreign policy initiatives.

The Routledge Handbook on Spaces of Urban Politics provides a comprehensive statement and reference point for urban politics. The scope of this handbook's coverage and contributions engages with and reflects upon the most important, innovative and recent critical developments to the interdisciplinary field of urban politics, drawing upon a range of examples from within and across the Global North and Global South. This handbook is organized into nine interrelated sections, with an

introductory chapter setting out the rationale, aims and structure of the Handbook, and short introductory commentaries at the beginning of each part. It questions the eliding of 'urban politics' into the 'politics of the city', reconsidering the usefulness of the distinction between 'old' and 'new' urban politics, considering issues of 'class', 'gender', 'race' and the ways in which they intersect, appear and reappear in matters of urban politics, how best to theorize the roles of capital, the state and other actors, such as social movements, in the production of the city and, finally, issues of doing urban political research. The various chapters explore the issues of urban politics of economic development, environment and nature in the city, governance and planning, the politics of labour as well as living spaces. The concluding sections of the Handbook examine the politics over alternative visions of cities of the future and provide concluding discussions and reflections, particularly on the futures for urban politics in an increasingly 'global' and multidisciplinary context. With over forty-five contributions from leading international scholars in the field, this handbook provides critical reviews and appraisals of current conceptual and theoretical approaches and future developments in urban politics. It is a key reference to all researchers and policy-makers with an interest in urban politics.

With contributions from over fifty architects, planners, geographers, historians, and journalists, *The Arsenal* offers a wide-ranging view of the forces that shape our cities. Who gets to be where? *The Arsenal of Exclusion & Inclusion* examines some of the policies, practices, and physical artifacts that have been used by planners, policymakers, developers, real estate brokers, community activists, and other urban actors in the United States to draw, erase, or redraw the lines that divide. *The Arsenal* inventories these weapons of exclusion and inclusion, describes how they have been used, and speculates about how they might be deployed (or retired) for the sake of more open cities in which more people have access to more places. With contributions from over fifty architects, planners, geographers, historians, and journalists, *The Arsenal* offers a wide-ranging view

of the forces that shape our cities. With contributions from some of the best minds in architecture, such as Julie Behrens, Bill Bishop, Lisa Brawley, Ava Bromberg, Marshall Brown, Common Room, Charles Connerly, Nathan Connolly, Margaret Crawford, Alexander D'Hooghe, Elizabeth Evitts Dickenson, David Freund, Gerald Frug, Vincent James, Jeffrey Johnson, Michael Kubo, Kaja Kuhl, Matthew Lassiter, Amy Lavine, Setha Low, Thomas Oles, Michael Piper, Wendy Plotkin, Jenny Polak, Albert Pope, Mathan Ratinam, Brian Ripel, James Rojas, Theresa Schwarz, Roger Sherman, Susan Sloan, Lior Strahilevitz, Meredith TenHoor, William TenHoor, Thumb Projects (Graphic Design), Stephen Walker and Jennifer Yoos, among others. Mentoring Geography Teachers in the Secondary School supports both new and experienced mentors in developing their knowledge and skills in mentoring in geography education. Within the

book, chapter authors critically consider how mentoring has been conceptualised and represented in policy and academic debate, as well as examining how mentoring in geography education has been experienced and perceived in practice. Chapters in the book explore a range of perspectives, experiences and aspects of mentoring geography teachers, including: • Critical engagement with educational policy and practice • Perspectives from beginning geography teachers • Mentoring as a professional development opportunity • The value of engaging with the geography education community in teacher education • How mentoring meetings and conversations can support beginning geography teachers in their growth and development This book is a vital source of support and inspiration for all those involved in developing the next generation of geography teachers. The themes of justice, agency and voice - raised and engaged with implicitly and explicitly throughout this edited collection - are of critical importance to mentors, beginning teachers and geography education more broadly in developing and enacting a progressive vision of mentoring.

The United States has been experiencing an energy transition for over four decades, and now - thanks to the Clean Power Plan of the Obama Administration and the Paris climate agreement - a clean energy future is moving closer to reality. In *Clean Power Politics*, Joseph Tomain describes how clean energy policies have been developed and, more importantly, what's necessary for a successful transition to a clean energy future, including technological innovation, new business models, and regulatory reforms. The energy system of the future will minimize the environmental costs of traditional energy production and consumption, and emphasize expanded use of natural resources and energy efficiency.

Because many new energy technologies can be produced and consumed at smaller scales, they will shift decision-making power away from traditional utilities and empower consumers to make energy choices about consumption and price. In this way, a clean energy future embodies a democratization of energy.
