Maths Hodder Gibson

"Because of the insights offered the book under review should be compulsory reading for Ministers of Education and educational planners as well as for students of educational reform. They would find it readable, informative and disturbing. This could well become a classic account of why innovations fail. - Keith Watson, Department of Education Studies and Management, University of Reading Educational investment is now back at the top of the development agenda. The World Conference on Education for All confirmed the commitment of national governments and donors to provide opportunities for all children to enrol in school and reach minimum levels of achievement. This book takes a new look at the problems that confront politicians, planners, curriculum developers and teachers in implementing educational innovations in developing countries. The insights into theory and practice that emerge provide the intellectual yeast for the development of effective innovation strategies for the next decade.

A Companion to School Experience Philip Allan

This work aims to combine comprehensive coverage of the full range of topics with a flexible approach to learning. It covers basic geographical skills and offers help with revision and exam techniques.

Practical Design Patterns for Teaching and Learning with Technology Letts and Lonsdale

Routledge

The New Wider World Coursemate for WJEC A GCSE Geography provides summaries of key content and key ideas to support WJEC's 2001 Geography A specification.

Perspectives on Practice Hodder Gibson

These are challenging times in which to be an educator. The constant flow of innovation offers new opportunities to support learners in an environment of ever-shifting demands. Educators work as they have always done: making the most of the resources at hand, and dealing with constraints, to provide experiences which foster growth. This was John Dewey's ideal of education 80 years ago and it is still relevant today. This view sees education as a practice that achieves its goals through creative processes involving both craft and design. Craft is visible in the resources that educators produce and in their interactions with learners. Design, though, is tacit, and educators are often unaware of their own design practices. The rapid pace of change is shifting the balance from craft to design, requiring that educators' design work become visible, shareable and malleable. The participatory patterns workshop is a method for doing this through engaging practitioners in collaborative reflection leading to the production of structured representations of design knowledge. The editors have led many such workshops and this book is a record of that endeavour and its outcomes in the form of practical design narratives, patterns and scenarios that can be used to address challenges in teaching and learning with technology.

CCEA A-level Geography Student Guide 3: AS Unit 3/A2 Hodder Education
