geological engineering program was evaluated during fall, 2004, as part of the general review by the Accreditation Board for Engineering and Technology (ABET) for engineering programs at South Dakota School of Mines and Technology. Nine of the undergraduate engineering programs at the school

were visited during October 17 to 19, *Geological Engineering Syllabus - 2004* In one sense, geological engineering is a form of environmental engineering. The MS program emphasizes the professional nature of the geological engineering discipline. Consequently students are

required to be excellent in both geology and engineering core subjects. If they are deficient in the core courses they must be taken.
