Geometric Coloring Book Volume 1 Only 1 million Incorporated
This book is third in a series of textbooks on geometric pattern design used at the Istanbul Design Center. It is intended as a tutorial book for 30 hours basic course on geometric patterns in Islamic arts. The content of this book covers some major areas of geometric pattern design. In chapter 2 we discuss how one can approach a complex geometric pattern. It is the most important part in understanding the general structure of any pattern. In chapter 3 we discuss and experiment with patterns built on triangular grids and square grids. This is the simplest

group of geometric patterns and usually neglected. In chapters 4 and 5 we deal with 6 and 12 fold patterns. These are the patterns with local symmetries D6 and D12. Usually, we refer to them as hexagonal and dodecagonal patterns. In chapters 6 and 7 we discuss octagonal patterns. Here we also briefly discuss differences between eastern (Central Asia and India) and western octagonal patterns (Morocco and Spain). Finally, in chapter 8 we discuss briefly decagonal patterns, i.e. patterns with D10 local symmetries. More about decagonal patterns readers can find in two other books published by Istanbul Design Publishing in 2019.

Colour and Create - Geometric Patterns Courier Corporation

Geometric Design Coloring Book was designed with the main objective of having a collection of geometric designs in book form as a coloring book but it has other

uses as well. The designs can be incorporated into any art program at all grade levels, are usable as quilt patterns by quilters and may be colored just for the fun of creating interesting designs. For elementary teachers this is an excellent opportunity to use the designs in a classroom art lesson. Teaching students about the color wheel is an example of how the designs can be useful. This is a good time to discuss the primary colors...red, yellow and blue. When red, yellow and blue are mixed all other colors are created. Orange, green and purple are secondary colors made when two of the primary colors are mixed. This is a good time to actually have the students mix colors. After discussions about primary colors and mixing colors it is time to use the various pages to create works of art. Allow students to experiment as they select various color

combinations. Teachers are permitted to make enough copies for classroom assignments.
