A simple equation, Pythagorean Theorem states that the square of the hypotenuse (the side opposite to the right angle triangle) is equal to the sum of the other two sides. Following is how the Pythagorean equation is written: $a^2 + b^2 = c^2$. In the aforementioned equation, c is the length of the hypotenuse while the length of the other two sides of the triangle are represented by b and a.

Geometry Crossword - Gimnazija Ivana Zakmardija ...

A line that intersects two or more coplanar lines at two different points is called a transversal. In the diagram on the next page, line t is a transversal of lines q and r. Notice that line t forms a total of eight angles with lines q and r. These angles, and specific pairings of
