Georgia GPS Edition Coach, Standards-based Instruction Springer Thanks to digital media, coaching doesn't have to be constrained by geographical and temporal boundaries.

Using digital media to facilitate coaching processes however, creates a distinct form of coaching practice that requires additional skill from the coach. The Digital Coach contains insights based on a comprehensive, exploratory research that analysed the discussions of a 1,000 member strong online community of coaches and several interviews with coaches to understand their practical experiences of working with technology. At the same time, the book offers information, insights, and examples that can be readily used by the coaching practitioner. Based on the developments in the field, the book provides suggestions about improving the usability of coaching software, and it offers reflections on how emerging technologies like immersive Virtual Reality, Augmented Reality, and Artificial Intelligence might extend coaching practice. Whilst acknowledging the limitations and potential risks that may arise by integrating digital media in coaching, the book suggests that coaching success doesn't only depend on media capabilities, but also on the coach. The digital coach develops enhanced coaching skills and adapts coaching practice to the media in use. The book is dedicated to the coaching practitioner who uses digital media or who is considering doing so, and is relevant for coaching supervisors, buyers of coaching services, human resource professionals, and software designers.

The Prodigy Down East Books

A research-based guide for educators to the practical methods of understanding, evaluating and facilitating the change process.

Significantly revised based on student and instructor feedback, the new third edition of *Implementing Change* continues to examine the ways in which change processes are experienced by those "on the ground" while adding new features, new material and the most current research. Based primarily on the Concerns Based Adoption Model (CBAM), this user-friendly text focuses on introducing constructs that can be used by those engaged in facilitating change processes as well as those who are evaluating and studying change. Rather than maintaining a bird's eye view of change processes, each chapter introduces a research-based, research-verified construct about change that captures the complexity of implementing change and the diversity of reactions to it. With a stress on pedagogical aids, each chapter incorporates practical examples, sample research, case studies, reflection questions and examples of common roadblocks to change.
