Violence against
women is a major

problem in all countries, affecting women in every socio-economic group and at every life stage. Yet, when women enjoy good social and economic status they are less vulnerable to violence across all societies. This book develops a political economy approach to understanding violence against women - from the household to the transnational level - accounting for its globally increasing scale and brutality. *Civil Engineering*

We know that gender traits and mental disorders are based on social, cultural, personal and physiological background. In order to formulate the best management plan for the patient, the mental health practitioner needs to incorporate all available information. the book will help mental health professional s formulate the best management plan for the individual. Covering issues including perinatal psychiatric disorders, depression, eating disorders, schizizophrenia, and alcohol and drug abuse - from a female perspective - Women and Mental Health will

prove a valuable tool for all those working in the fields of mental health.

Routledge

This volume assesses the nexus of gender and transboundary water governance, containing empirical case studies, discourse analyses, practitioners' accounts, and theoretical reflections.

Transboundary water governance exists at the

intersection of two highly masculinised fields: diplomacy and water resources management. In both fields, positions are mainly held by men, and core ideas, norms, and guiding principles that are presented as neutral, are both shaped by men and based on male experiences. This book sheds light on the often hidden gender dynamics of water conflict and cooperation at the transboundary level and on the implicit assumptions that guide research and

policies. The individual chapters of the book, based on case studies from around the world, reveal the gendered nature of water diplomacy, take stock of the number of women involved in organisations that govern shared waters, and analyse programmes that have been set up to promote women in water diplomacy and the obstacles that they face. They explore and contest leading narratives and knowledge that have been shaped mainly by privileged men,

and assess how the participation of women concretely impacts the practices, routines, and processes of water negotiations. This volume will be of great interest to students and scholars of water governance, water diplomacy, gender, international relations and environmental politics. It will also be of interest to professionals and policymakers involved in supporting gender mainstreaming in water cooperation. Gender Dynamics in Transboundary Water Governance Oxford University

'Rape Loot Pillage' offers a new framework for understanding conflict-related sexual violence based on feminist international political economy. By looking at patterns of contemporary conflict this book proposes a new typology of wartime sexual violence that ties the 'value' of this violence to the politico-economic objectives of the perpetrators in different conflict contexts.
Torture and Its Definition in International Law LIT Verlag Münster

Roja Singh's critical ethnography on caste and gender is rooted in interactions, and lived experiences in communities of Dalit women in Tamil Nadu, India. Situated in transnational feminist discourses, Singh's perspective as a Dalit woman, provides an intersectional social analysis of power structures that sustain caste dominance in South India today. She

describes strategies of social change in Dalit women's activism as rooted in subversive applications of imposed identities of "difference" thwarting social boundaries and punishment traditions. The core of this interdisciplinary work is Dalit women's songs, oral and written testimonial narratives, including Singh's personal story. Gender Inequalities CRC Press

Tubular Structures XVI contains the latest scientific and engineering developments in the field of tubular steel structures, as presented at the 16th International Symposium on Tubular Structures (ISTS16, Melbourne, Australia, 4-6 December 2017). The International Symposium on Tubular Structures (ISTS) has a long-standing reputation for being the

principal showcase for manufactured tubing and the prime international forum for presentation and discussion of research, developments and applications in this field. Various key and emerging subjects in the field of hollow structural sections are covered, such as: special applications and case studies, static and fatigue behaviour of connections/joints

, concrete-filled applicable to or developers of tubular and composite buildings, structures, tubular bridges, steel members and offshore structures, specification offshore structures, cranes, trusses committees, earthquake and and towers. academics and dynamic Tubular research resistance, Structures XVI students all specification and standard is thus a around the developments, reference pertinent world. material source for Physical properties and architects, civil Modelling in section and mechanical Volume 1 forming, engineers, Emerald Group stainless and designers, steel Publishing high-strength fabricators and The steel contractors, International structures, fire, manufacturers Science impact and of hollow Congress blast response. sections or Association Research and related (ISCA) development construction organized the issues products, trade 1st presented in associations International this topical involved with Science book are tubing, owners Congress

(ISC-2011) at Indore, M.P. India with Science and Technology for Sustainable Development as its focal theme. The congress was hosted by Maharaja Ranjit Singh College of Professional Sciences on 24th and 25th December 2011. It was distributed in 20 sections. A total 900 Research Papers and 1300 registrations all over the world were received. Delegates from

Malaysia, Egypt, Bangladesh, Nigeria, Indonesia, Iran, South Africa, Iraq, Mexico, Japan, Uganda, Pakistan, Kingdom of Saudi Arabia, Russia, Latvia, Nepal, Lithuanian and from length and breadth of our nation participated in the ISC-2011. Restorative Justice and Violence Against Women Taylor & Francis This text presents an interdisciplinary approach to

definition of torture by a group of prominent scholars of behavioural sciences, international law, human rights, and public health. It represents a first ever attempt to compare behavioural science and international law perspectives on definitional issues and promote a sound theory- and evidence-based understanding of torture Handbook of Research on Applied Artificial

Remembering Revolution constitutes one of the first major studies of women's role and involvement in the late 1960s' radical Left

Naxalbari movement of West Bengal, the birthplace of Indian Maoism. relation to women's involvement in the late 1960s' radical Naxalbari movement of West Bengal. Drawing from historiographic, popular, and personal memoirs, it provides an innovative conceptual analysis of the Naxalbari movement principally in terms of gender, violence, and subjectivity. This handbook provides researchers and students with an overview of the field of sustainability indicators (SIs) as applied in the interdisciplinary field of sustainable development. The editors have sought to include views from the center ground of SI development but also divergent ideas which represent some of the diverse, challenging and even edgy observations which are prominent in the wider field of SI

thinking. The contributions in this handbook:

- clearly set out the theoretical background and history of SIs, their origins, roots and initial goals
- expand on the disciplines and modalities employed to develop SIs of various kinds
- assess the various ways in which SI data are gathered and the availability (over space and time) and quality issues that surround them
- explore the multiplex world of SIs as expressed in

agencies around the world, via examples of SI practice and the lessons that have emerged from them

- critically review the progress that SIs have made over the last 30 years
- express the divergence of views which are held about the value of SIs, including differing theories on their efficacy, efficiency and ethics
- explore the frontier of contemporary SI thinking, reviewing ante/post and systemic alternatives

This

multidisciplinary and international handbook will be of great interest to researchers, students and practitioners working in sustainability research and practice.

"Many researchers and software developers have put a lot of effort into finding solutions for automated code checking. This book is a good summary of these efforts and provides readers with a comprehensive

understanding of the status of such technologies in the industry. It also guides readers on implementation of such techniques using the platforms and tools currently available in the industry." — Issa Ramaji, University of North Florida, USA Building Information Modeling: Automated Code Checking and Compliance Processes covers current and emerging trends in automating the processes of

examining building design against codes and standards of practice. The role of Building Information Modeling (BIM) technologies in these processes is thoroughly analyzed and explains how this new technology is significantly transforming modern architecture, engineering, and construction (AEC) domains. The book also introduces the theoretical background of computerizing compliance verification, including domain

knowledge representations, building model representations, and automated code checking systems. An underlying goal for the material covered is to present the use of BIM technology as an integral part of the automated auditing process that can lead to a more comprehensive, intelligent, and integrated building design – a design where an optimized solution can be achieved in harmony with the current codes and standards of

practice. This new proposed BIM-based framework for automating code conformance checking is one of the most powerful methods presently available to reflect actual building code requirements, and the methods described in the book offer significant benefits to the AEC industry such as:

- Providing consistency in interpretation of regulatory provisions
- Reducing code compliance validation

errors, and the cost and time associated with compliance checking Allows for the ability to self-check required aspects before bidding Reduces the amount of time and resources required during design review Allows for optimal design, along with faster turnaround on feedback, and potentially faster approvals for construction permits by building and infrastructure authorities

Gender Visibility and Erasure CRC Press

This book addresses sexual and gender-based violence (SGBV) against women from an international law point of view. It identifies the reasons behind SGBV against women with a specific focus on cultural practices that try to justify it and highlights the legal challenges related to the topic for both national and international justice systems. The seven chapters

of the book are:

- i) Introduction
- ii) SGBV a global concern;
- iii) International legal protection;
- iv) Role of international institutions;
- v) Role of cultural factors and Challenges
- vii) Conclusions. In the light of concerted global efforts to bring to an end, or at least severely contain SGBV against women, the book provides a future roadmap to the United Nations

system, States, international institutions, multidisciplinary scholars, civil society organizations and other global actors. The book contains a Foreword by Peter Maurer, President of International Committee of the Red Cross (ICRC). The Surveyor and Municipal and County Engineer Oxford University Press, USA

A majority of people living in rural areas and urban slums worldwide have minimal access to

healthcare. Without information about what to give a child with stomach flu, how to relieve the pain of a broken bone, and how to work against increased substance abuse in a village, the whole community suffers. Children, adolescents, adults, and older people are all affected by the lack of what many of us view as basic healthcare, such as vaccination, pain killers, and contraceptives. To improve living conditions and life expectancy, the people in urban slums and rural areas need access to a trained health care worker, and

a functioning clinic. Setting up Community Health and Development Programmes in Low and Middle Income Settings illustrates how to start, develop, and maintain a health care programme in poor areas across the world. The focus is on the community, and how people can work together to improve health through sanitation, storage of food, fresh water, and more. Currently, there is a lack of 17 million trained health care workers worldwide. Bridging the gap between medical professionals and people in low income areas, the aim of this book is for a member of the community to receive training and become the health care worker in their village. They will then in turn spread information and set up groups working to improve health. The book also explains in detail how communities can work alongside experts to ensure that practices and processes work effectively to bring the greatest impact. Copiously illustrated and written in easy-to-read English, this practical guide is designed to be extremely user friendly. Ideal for academics, students, programme managers, and health care practitioners in low and middle income settings worldwide, it is an evidence based source full of examples from the field. Setting up Community Health and Development Programmes in Low and Middle Income Settings shows how a community can both identify and solve its own problems, and in that way own its future. Violence Against Women Oxford University Press The Proceeding book presented the 3rd International Conference on Gender Equality and Ecological Justice, which is an international conference hosted by Universitas Kristen Satya Wacana. Total 29 full papers presented were carefully reviewed and selected from about 50 submissions with the topics not limited to Gender Equality and Ecological Justice. The 2019 Conference was held at Universitas Kristen Satya

Wacana, Salatiga, Indonesia from 10 to 11 July 2019 which had been attended by academics and researchers from various universities worldwide with the theme of an Ecofeminist Initiative: Science and Knowledge Synergy Towards Global Wisdom & Sustainability. Civil Engineering Exam Emerald Group Publishing This book casts a light on the daily struggles and achievements of 'gender experts' working in environment and development organisations, where they are charged with advancing gender equality and

social equity and aligning this with visions of sustainable development. Developed through a series of conversations convened by the book 's editors with leading practitioners from research, advocacy and donor organisations, this text explores the ways gender professionals – specialists and experts, researchers, organizational focal points – deal with personal, power-laden realities associated with navigating gender in everyday practice. In turn, wider questions of epistemology and

hierarchies of situated knowledges are examined, where gender analysis is brought into fields defined as largely techno-scientific, positivist and managerialist. Drawing on insights from feminist political ecology and feminist science, technology and society studies, the authors and their collaborators reveal and reflect upon strategies that serve to mute epistemological boundaries and enable small changes to be carved out that on occasions open up promising and alternative pathways for an equitable future. This book will be

of great relevance to scholars and practitioners with an interest in environment and development, science and technology, and gender and women ' s studies more broadly. The Open Access version of this book, available at <https://www.taylorfrancis.com/book/s/e/9781351175180>, has been made available under a Creative Commons Attribution-Non Commercial-No Derivatives 4.0 license. Remembering Revolution IGI Global Through thematic concentration on gender/sexualit

y and violence and generic concentration on Poetic Edda and later texts which rework or allude to it, David Clark provides a diverse but coherent exploration of both key and neglected Norse texts. SOUVENIR of 1st International Science Congress (ISC-2011) Oxford University Press This book explains how learning from past mistakes in urban design can help to enhance sustainable cities and how the principles of Green Urbanism can yield more

resilient urban settlements. Environmental design is a fundamental principle in shaping cities. However, environmental challenges like increased resource consumption, water degradation and waste-related issues are among the greatest problems now facing humanity – which is why these issues need to be considered with regard to “ smart cities, ” either for the development of new urban centers or for the transformation of existing cities. The book not only discusses the importance of

integrating sustainability principles in the urban design process, but also demonstrates their application to the development of sustainable cities. As such, the book offers essential information and a source of inspiration for all those who want to build more sustainable cities. Gender Violence in Africa European Alliance for Innovation "Directory of members, constitution and by-laws of the Society of American military engineers.

1935" inserted in v. 27. Bridge Maintenance, Safety, Management, Resilience and Sustainability Springer This manual of civil engineering from 1894 includes chapters on surveying, levelling, setting out, earthwork, masonry, carpentry, metallic structures, underground and submerged structures, the collection, conveyance and distribution of water, and tidal and coastal works.
