This second edition updates a course which has proven to be a perfect fit for classes the world over. Engaging content and a strong focus on grammar and vocabulary combine to make this course a hit with both teachers and students. Popular course features have been refreshed with new content, including the imaginative reading and listening topics, 'Culture in Mind', and 'Everyday English' sections. New for the second edition is a DVD-ROM with the Level 1 Student's Book containing games, extra exercises and videos featuring the photostories' characters as well as a 'Videoke' record-yourself

function. There is a full 'Vocabulary bank' at the back of the book which expands upon lexical sets learned in the units. Nederlandsch letterkundig nieuwsblad LAPA Uitgewers
This book offers 150 12-lead ECGs and rhythm strips, each with a clinical case history and question. The full ECG is reproduced and a study of it with the case history should be enough to give an answer. On the back the case is examined, with a description of the main features of the ECG along with a clinical interpretation and a "what to do" section. The cases are graded in difficulty. The unique page size allows presentation of all 12-lead ECGs across a single page for clarity. Several of the cases incorporate chest X-rays and coronary angiograms

illustrating the appearances that are associated with various cardiac conditions. All the cases are graded in difficulty and are cross-referenced to the new editions of ECG Made Easy and ECG in Practice for further information. For this Fourth Edition over 30 new ECGs have been included, mainly to provide clearer examples, though the book deliberately retains some technically poor records to maintain a 'real-world' perspective.

Organization and Management is an introduction to theories and contemporary practice in cross-border business management. The book reviews the practice of management where a home-market approach no longer

achieves and sustains success in an increasingly competitive global environment. Readers will learn about the experiences of companies in many industries operating in countries such as Argentina, China, Britain, France, Germany, India, the Netherlands, Poland, and the United States. This book is designed for students taking introductory courses in organization, and international management. Through carefully developed case studies, exercises, and integrated text material, this book bridges theory and practice. The full colour layout of the book supports self-study, as well as group study and team work.

Despite its inherent joys, the challenges of parenting can produce considerable stress. These challenges multiply—and the quality of parenting suffers—when a parent or child has mental health issues, or when parents are in conflict. Even under optimal circumstances, the constant changes as children develop can tax parents' inner resources, often undoing the best intentions and parenting courses. Mindful Parenting: A Guide for Mental Health Practitioners offers an evidence-based, eight week structured mindfulness training program for parents with lasting benefits for parents and their children. Designed for use in mental health contexts, its methods are effective whether parents or children have behavioral or emotional issues. The

Perspectives from parents	work to argue for the body's

centrality to care ethics, doing so by analyzing our corporeality at the phenomenological level. It develops the idea that our bodies are central to our morality, paying particular attention to the ways we come to care for one another. Hamington's argues that human bodies are "built to care"; as a result, embodiment must be recognized as a central factor in moral consideration. He takes the reader on an exciting journey from modern care ethics to Merleau-Ponty's philosophy of the body and then to Jane Addams's social activism and philosophy. The ideas in Embodied Care do not lead to yet another competing theory of morality; rather, they progress through theory and case studies to suggest that no theory of morality

can be complete without a full consideration of the body.
