patients, or channel the money toward preventing the conditions that lead to renal failure in the first place? Policymakers dealing with the realities of limited health care budgets face tough decisions like these regularly. And for many individuals, their personal health care choices are equally stark: paying for medical treatment could push them into poverty. Many low- and middle-income countries now aspire to universal health coverage, where governments ensure that all people have access to the quality health services they need without risk of impoverishment. But for universal health coverage to become reality, the health services offered must be consistent with the funds available—and this implies tough everyday choices for policymakers that could be the difference between life and death for those affected by any given condition or disease. The situation is particularly acute in low- and middle income countries where public spending on health is on the rise but still extremely low, and where demand for expanded services is growing rapidly. What ' s In, What ' s Out: Designing Benefits for Universal Health Coverage argues that the creation of an explicit health benefits plan—a defined list of services that are and are not available—is an essential element in creating a sustainable system of universal health coverage. With contributions from

leading health economists and policy experts, the book considers the many dimensions of governance, institutions, methods, political economy, and ethics that are needed to decide what 's in and what 's out in a way that is fair, evidence-based, and sustainable over time.

Vi Keeland "Warm, witty, imaginative. . . . This is a rich and winning book."-The New Yorker. The autobiography of novelist, folklorist, and anthropologist Zora

Neale Hurston, one of America's most captivating and important authors, Dust Tracks on a Road, is daring, heartbreaking, and humorous. Hurston's dramatic Southern books, such as Jonah's Gourd Vine and, most famously, Their Eyes Were Watching God, continue to captivate readers with their lyrical beauty, piercing detail, and compelling emotionality. Dust Tracks on a Road was first published in 1942 and tells Hurston's personal narrative in her own words.

Why do underdogs succeed so much

more than we expect? How do the weak outsmart the strong? In David and Goliath Malcolm Gladwell, no.1 bestselling author of The Tipping Point, Blink, Outliers and What the Dog Saw, takes us on a scintillating and surprising journey through the hidden dynamics that shape the balance of power between the small and the mighty. From the conflicts in Northern Ireland, through the tactics of civil rights leaders and the problem of privilege, Gladwell demonstrates how we

misunderstand the true meaning of advantage and disadvantage. When does a traumatic childhood work in someone's favour? How can a disability leave someone better off? And do you really want your child to go to the best school he or she can get into? David and Goliath draws on the stories of remarkable underdogs, history, science, psychology and on Malcolm Gladwell's unparalleled ability to make the connections others miss. Park Reed is a bastard in every sense of the word. He hasn't always been this way. But after his heart was broken by the only girl he ever loved, being heartless gets him through the day and allows him to fill his nights with the nameless girls he has no intentions of seeing again. He now lives his life following his ever-growing list of

Braden is everything Park is not. She's sweet, caring, and an all-around nice person. She tries to follow Lucy's Rules to Live By everyday. When Park moves in with Jessie, which happens to be the floor below Lucy, Jessie's one stipulation: Lucy is off limits to Park. The problem with that is Lucy is determined to be a good friend to Park and see past the drinking and random girls to find the man beneath it all. The other problem: Park follows his own rules. *This is a New Adult novel. Recommended for 17+ due to sexual situations, harsh language, and drug

"Sometimes never is a distorted perception. I love you, Hope. And I'm not the only one. I know you care about me. I see it in your eyes. I feel it. Everybody needs love. Everybody. And some people need it more than others. You're a liar if you say you don't. I'll do that

for you. I'll love you. All you have to do is let me."
-Sometimes Never
What happened in the years between the final chapter and epilogue of Sometimes Never? Blackbird is an 18,000+ word novella that continues Mason and Hope's story as they finish high school, start separate colleges, and confront their demons. Though Blackbird can be read on its own, it is better enjoyed after reading Sometimes Never. Recommended for 17+ due to harsh language and some sexual situations.

World Development Report 1978 Cheryl McIntyre

This casebook provides a set of cases that reveal the current complexity of medical decision-making, ethical reasoning, and communication at the end of life for hospitalized patients and those who care for and about them. End-of-life issues are a controversial part of medical practice and of everyday life. Working through these cases illuminates both the practical and philosophical challenges presented by the

moral problems that surface in contemporary end-of-life care. Each case involved real people, with varying goals and constraints, who tried to make the best decisions possible under demanding conditions. Though there were no easy solutions, nor ones that satisfied all stakeholders, there are important lessons to be learned about the ways end-of-life care can continue to improve. This advanced casebook is a must-read for medical and nursing students, students in the allied

health professions, health communication scholars, bioethicists, those studying hospital and public administration, as well as for practicing physicians and educators.

Since 1980, the number of people in U.S. prisons has increased more than 450%. Despite a crime rate that has been falling steadily for decades, California has led the way in this explosion, with what a state analyst called "the biggest prison building project in the history of the

world." Golden Gulag provides the first detailed explanation for that buildup by looking at how political and economic forces, ranging from global to local, conjoined to produce the prison boom. In an informed and impassioned account, Ruth Wilson Gilmore examines this issue through statewide, rural, and urban perspectives to explain how the expansion developed from surpluses of finance capital, labor, land, and state capacity.
