Jennie's favorite aunt is sending her a new hat, and Jennie is sure it will be beautiful. But when the box arrives, the hat inside is very plain.

She had imagined a wonderful hat with big colorful flowers and even tries to make her own hat from a straw basket! Jennie is almost ready to give up on her dream when she receives a fanciful surprise from some very special friends. Ezra Jack Keats's timelessly charming illustrations will leave readers wishing for a dream hat of their own.

Strategic Sustainable Business provides readers with a broad overview of the core concepts of sustainability and sustainable business practice.

It is intended for use in undergraduate business courses and will also be of interest to students in environmental studies, engineering, urban planning, and government. This book is not meant to exhort all business people on the path to sustainability enlightenment but to highlight some of the benefits, opportunities, and challenges associated with sustainable business practices. What distinguishes this book is that it provides a conceptual

foundation to promote understanding of sustainability concepts and frameworks and also discusses real-world business examples of sustainability in action. It is believed that this is the best way to teach sustainability as it applies to the business world—a conceptual foundation with practical application. Sustainable business involves businesses operating with interest and concern for their long-term economic,

environmental, and social impact. For-profit businesses focus first and foremost on their own economic bottom line, oftentimes, with a short-term perspective. However, with a sustainability perspective, businesses also consider a longer-term and broader triple bottom line that takes into account not only company profits but also environmental and social impacts. The economic, environmental, and social perspectives are increasingly interrelated and relevant for

businesses. This text was compiled, edited, and adapted from multiple open source textbooks and created under a Creative Commons License without attribution as requested by the work's original creator or licensee. For a free copy of the e-text, please visit HCIPress.org.

Publishers Fiction. Women's Studies. Short Stories.
