A comprehensive guide to traumatic brain injury, beginning with an introduction to epidemiology, biomechanics and pathology of head injury, then discussing resulting conditions, and the academic and clinical aspects of their management. Written by experts in the fields of neuropathology, neurology and rehabilitation medicine, dedicated chapters also examine rarer aspects including post-traumatic basal ganglia haematoma, dural sinus thrombosis, CSF otorrhea and facial injuries. Fluid and electrolyte management are also discussed. Key Features Comprehensive guide to traumatic brain injury discussing numerous conditions resulting from head trauma, as well as basic epidemiology, biomechanics and pathology Includes chapters on rarer conditions, as well as fluid and electrolyte management Almost 300 colour images and illustrations Cue IAP "The need for a guidebook enabling all those interested in Dutch art to find out at a glance which paintings and drawings by particular artists or which works of applied art of various periods are to be found in the major American public collections is so obvious that it comes as a surprise to discover that none as ever been written.

---

Until now anyone wishing to know where Dutch art from past centuries or the not-so-distant past could be seen or studied had to rely on memory or hearsay, or had to consult the countless catalogues and publications of the far flung individual museums. Since a fundamental goal of American collecting has been to educate people about all cultures, Dutch art, like the art of so many other nations, is found in virtually every city and town across the country. . . Now we have a guide that tells us where to find the art that we seek and that gives us a lively but professional analysis of the historical significance of these treasures."--Preface

broader context of his activities and engagements as a public intellectual. This project charts a path through two of Dewey's actual debates with his contemporaries, Leon Trotsky and Robert Hutchins, to two reconstructed debates with contemporary intellectuals, E.D. Hirsch and Robert Talisse, both of whom criticized Dewey's ideas long after the child American philosopher's death and, finally, to two recent debates, one on home schooling and the other on U.S. foreign policy, in which Dewey's ideas offer a unique and compelling vision of a way forward.
