The Global Initiative for Asthma (GINA), founded in 1993, embodies a network of public health organizations and medical societies, as well as other individuals concerned with

asthma.

Major asthma guideline update: ICS-LABA as-needed replaces ...

The Global Initiative for Asthma (GINA) was established in 1993 by the World Health Organization and National Heart Lung and Blood Institute to develop a global strategy for managing and preventing asthma. GINA reports, now funded independently through the sale of GINA products, have provided the foundation for many national guidelines.

Global Initiative for Asthma - Global Initiative for ...

The Global Initiative for Asthma (GINA) now advises that, in general: Most people with asthma can now be prescribed just one inhaler: an inhaled corticosteroid-and-long-acting beta agonist (ICS-LABA) combination product, to be used as both a maintenance (preventive) and rescue inhaler.

I would like to share with you my experience and impressions about the Congress International Guidelines on Rhinitis, Asthma and COPD Global Initiatives ARIA, GINA and GOLD, which took place in Modena, Italy at 1-3 March 2011.

The GINA asthma strategy report: what 's new for primary care?

The Global Asthma Report highlights issues surrounding asthma, and provides an overview of what is known and uncertain about the causes and triggers of the disease, the global prevalence, the implementation of management guidelines, the progress being made and the significant challenges today and for the future.

Treating Pediatric Asthma According Guidelines

The Global Initiative for Asthma (GINA) strives to increase awareness of asthma among health professionals,

health authorities, and the general public. Our goals include improving diagnoses, management and prevention of asthma by stimulating research, and providing evidence-based educational resources for worldwide use.
