The supercharger and turbocharger in their various forms and applications have both

been around for well over a century. What makes them so popular? Looks, power, performance, sound, and status. And how do they relate to, and improve upon, the performance level of a small-block Ford pushrod V-8 engine like a 289-302, a 351-Windsor, a Ford 351-Cleveland, or even the latest generation 4.6L/5.4L "modular" small-block V-8 engines? That's EXACTLY what this book is all about! While Ford dabbled in supercharging and turbocharging on production cars all the way back in 1957 with the legendary Thunderbird, and then again with Shelys and over-the-counter kits, and then again in the late '70s and early '80s with turbocharging 4-cylinder applications in Mustangs and SHOs, the real revolution in supercharging and turbocharging Ford products

has come through the aftermarket in more recent times. The Fox Mustang, created in 1979, and the platform that would eventually feature fuel injection in 1986, allowing much more boost, created a genre of lightning-quick and affordable performance cars.

Lyman Boats: Legend of the Lakes. . . is the definitive, all-inclusive history of the "Clinker-Built" boats that defined the lapstrake hull. Author Tom Koroknay has used his exclusive access to the original Lyman archives to tell the story of the Lyman family, their successful business, and the boats they built. Era by era, model by model, Koroknay details the development

of the lapstrake boats proudly built by the Lymans and their employees. The book is illustrated with more than 120 rare black and white photographs selected from the Lyman archives, as well as about 70 modern color photos of various Lyman boats. This is a must-have volume for any classic wooden boat enthusiast.

The Sailor's Book of Small Cruising Sailboats Open Road Media

For those who own a cherished but dilapidated fiberglass runabout, or for those who want a boat but are turned off by the high prices and often poor quality of today's offerings, this book explains everything there is to know about turning a rundown runabout into a real showpiece for a fraction of the cost of a new model.

Author Jim Anderson, a runabout renovator from Minnesota's Land of Ten Thousand Lakes, leads

readers through the whole renovation process. For those who think a project like this may be more than they can handle, renovating an old runabout is actually less complicated and expensive than adding on a deck or redoing a room--two of the most popular projects for home handymen. And Anderson's sense of humor and gift for providing simple solutions make Runabout Renovation as fun to read as it is easy to understand. The backyards of North America house literally millions of rundown runabouts ripe for renovation. With Jim Anderson's help, you can own a better boat than you can buy new, for a quarter of the price or less. And like a beautifully restored '57 Chevy, it'll have class. Low-cost alternatives for the powerboater on a budget.

Although more people own boats ranging in length from 14 to 24 feet than all others combined, most books published about boat repair and restoration are directed at the "big boat" or yacht owner. In addition, many marine dealers and technicians never seem to have the right answers or the time to spend on people who own "little boats." Hence Runabout Renovation, a complete guide to finding and fixing up old fiberglass speedboats. You'll learn how to: Choose and survey a boat Make cosmetic repairs and repaint your boat Replace the floor Reupholster and carpet the interior Build a new transom Upgrade electrical and mechanical systems . . . and much more. There's even a section on repairing aluminum boats, and one on installing and repairing horns, lights, bilge pumps, live wells,

and other speedboat accessories. "Considering the tens of thousands of fiberglass powerboats that exist today, one wonders why Jim Anderson's Runabout Renovation is so late in coming. Whether you're shopping for a used or new boat, or trying to maintain the value of a boat you already own, this book will prove indispensable."--Richard Lebowitz, Editor, Boating World
