literally millions of rundown runabouts ripe for renovation. With Jim Anderson's help, you can own a better boat than you can buy new, for a quarter of the price or less. And like a beautifully restored '57 Chevy, it'll have class. Low-cost alternatives for the powerboater on a budget. Although more people own boats ranging in length from 14 to 24 feet than all others combined, most books published about boat repair and restoration are directed at the "big boat" or yacht owner. In addition, many marine dealers and technicians never seem to have the right answers or the time to spend on people who own "little boats." Hence Runabout Renovation, a complete guide to finding and fixing up old fiberglass speedboats. You'll learn how to:

- Choose and survey a boat
- Make cosmetic repairs and repaint your boat
- Replace the floor
- Reupholster and carpet the interior
- Build a new transom
- Upgrade electrical and mechanical systems . . . and much more. There's

even a section on repairing aluminum boats, and one on installing and repairing horns, lights, bilge pumps, live wells, and other speedboat accessories.

"Considering the tens of thousands of fiberglass powerboats that exist today, one wonders why Jim Anderson's *Runabout Renovation* is so late in coming. Whether you're shopping for a used or new boat, or trying to maintain the value of a boat you already own, this book will prove indispensable."--Richard Lebowitz, Editor,

sound, and status.

And how do they relate to, and improve upon, the performance level of a small-block Ford pushrod V-8 engine like a 289-302, a 351-Windsor, a Ford 351-Cleveland, or even the latest generation 4.6L/5.4L "modular" small-block V-8 engines? That's EXACTLY what this book is all about! While Ford dabbled in supercharging and turbocharging on production cars all the way back in 1957 with the legendary Thunderbird, and then again with Shelbys and over-the-counter kits,

and then again in the late '70s and early '80s with turbocharging 4-cylinder applications in Mustangs and SHOs, the real revolution in supercharging and turbocharging Ford products has come through the aftermarket in more recent times. The Fox Mustang, created in 1979, and the platform that would eventually feature fuel injection in 1986, allowing much more boost, created a genre of lightning-quick and affordable performance cars.
