"This is History Book. It explored the grand scheme of world history as a product of real-life human beings pursuing their individual and collective interests. It also offered a global perspective on the past by focusing on both the distinctive characteristics of individual societies and the connections that have linked the fortunes of different societies. It has combined a clear chronological framework with the twin themes of traditions and encounters, which help to make the unwieldy story of world

history both more manageable and more engaging. From the beginning, *Traditions & Encounters* offered an inclusive vision of the global past—one that is meaningful and appropriate for the interdependent world of contemporary times”--
