World Geography Today  
McGraw-Hill/Glencoe

This resource book is designed to assist teachers in implementing California's history-social science framework at the 10th grade level. The models support implementation at the local level and may be used to plan topics and select resources for

professional development and preservice education. This document provides a link between the framework's course descriptions and teachers' lesson plans by suggesting substantive resources and instructional strategies to be used in conjunction with textbooks and supplementary materials. The resource book is divided into eight units: (1) "Unresolved Problems of the Modern World"; (2) "Connecting with Past Learnings: The Rise of Democratic Ideas"; (3) "The Industrial Revolution"; (4) "The Rise of Imperialism and Colonialism: A Case Study of India"; (5) "World War I and Its Consequences"; (6) "Totalitarianism in the Modern

World: Nazi Germany and Stalinist Russia"; (7) "World War II: Its Causes and Consequences"; and (8) "Nationalism in the Contemporary World." Each unit contains references. (EH)

'For geographers across the globe this book provides the arguments for a return to the teaching of geography and why they

should reject the politicisation of the subject by education policy makers and politicians. Standish's careful critique shows the necessity of a depoliticised geography curriculum the irony of which would be that it would ensure that every child could point to Iraq, Iran and Afghanistan on a map.' Prof. Dennis Hayes - Oxford Brookes University, UK 'A prescient and critical analysis of the changing face of geography teaching.

This book deserves to be widely read and debated. Alex Standish's book puts current trends in geography teaching in a historical and critical context. It comprises a forthright and timely defence of geographical education for its own sake.' Dr Jim Butcher, FRSA, Department of Sport Science, Tourism and Leisure, Canterbury Christ Church University. Since the early 1990s, educational policy makers and some subject leaders have been

---

seeking to fundamentally change the teaching of geography in UK and US schools, from a subject which encourages students to explore spatial concepts, ideas and skills, to a more ethics based subject concerned with the promotion of environmentalism, cultural diversity and social justice. In this book the new approach is critically examined, within a historical and ideological context, addressing a number of fundamental questions:	Should geography be used as a tool for the delivery of citizenship ideals? How does this affect the intellectual and moral value of geographical education for young people? If the state and teachers are taking more responsibility for the values, attitudes and emotional responses of students, how will they learn to develop these qualities for themselves? If global perspectives shift the focus of education from learning about the outside world to	learning about the self, what is its vision of social progress and conception of social change? This book advocates a return to liberal models of education, arguing that the new approach to geography currently being promoted for schools fundamentally undermines the educational value of the subject, and the freedom of young people to shape the world in which they live. A vital resource for teachers and student teachers alike, Global
