It's Regents time once again and the pressure to perform is on! However, don't sweat it-we're here to help! Generally speaking, the Regents choose the same types of questions year after year. This affords one the ability to concentrate on the topics that the Regents tests for in Global History, and cut out the less tested areas. This is what this review attempts to do. In this review, you will be provided a brief overview of Global History with integrated (actual) Regents questions from the last five years. This gives you, the student, a chance to study the material and immediately follow up with Regent's questions to ensure that you know what you have already studied. Also, a Regent has been inserted at the end which further gives you an opportunity to test your knowledge of the material. So go ahead and try it!

When Books Went to War Routledge

Despite the founding of the modern social studies curriculum nearly a century ago based on John Dewey's pragmatism philosophy, the field has never achieved a significant and broad implementation of his ideas. Dewey's instrumentalism offers social studies educators a tool for addressing vexing problems such as whether they should design classroom experiences using a traditional or a social studies approach to learning history, the role of digital technologies, the purpose and challenges of younger learners working with an expanding horizons curriculum, and many more. At the same time, Dewey's time-tested theories describe how students use the social studies curriculum to make meaning as well as provide teachers a blueprint for implementing engaging and interactive lessons. We have neglected Dewey, which has led to confusion, student disinterest, and widespread teaching methodologies contrary to theoretical and research best practices. Revisiting Dewey provides the why and how of what we do, an

ideal for creating a challenging and rigorous social studies curriculum while engaging students' interests.

Reviewing the Success of Full-Service Community Schools in the US Simon and Schuster

This New York Times bestselling account of books parachuted to soldiers during WWII is a " cultural history that does much to explain modern America " (USA Today).

When America entered World War II in 1941, we faced an enemy that had banned and burned 100 million books. Outraged librarians launched a campaign to send free books to American troops, gathering 20 million hardcover donations. Two years later, the War Department and the publishing industry stepped in with an extraordinary program: 120 million specially printed paperbacks designed for troops to carry in their pockets and rucksacks in every theater of war. These small, lightweight Armed Services Editions were beloved by the troops and are still fondly remembered today. Soldiers read them while waiting to land at Normandy, in hellish trenches in the midst of battles in the Pacific, in field hospitals, and on long bombing flights. This pioneering project not only lifted soldiers' spirits, but also helped rescue *The Great Gatsby* from obscurity and made Betty Smith, author of *A Tree Grows in Brooklyn*, into a national icon. "A thoroughly engaging, enlightening, and often uplifting account . . . I was enthralled and moved." — Tim O'Brien, author of *The Things They Carried* "Whether or not you're a book lover, you'll be moved." — Entertainment Weekly

Economics: The Definitive Encyclopedia from Theory to Practice [4 volumes] Houghton Mifflin Harcourt

Teaching Recent Global History explores innovative ways to teach world history, beginning with the early 20th century. The authors' unique approach unites historians, social studies teachers, and educational curriculum specialists to offer historically rich, pedagogically innovative, and academically rigorous lessons that help students connect with

and deeply understand key events and trends in recent global history. Highlighting the best scholarship for each major continent, the text explores the ways that this scholarship can be adapted by teachers in the classroom in order to engage and inspire students. Each of the eight main chapters highlights a particularly important event or theme, which is then complemented by a detailed discussion of a particular methodological approach. Key features include:

- An overarching narrative that helps readers address historical arguments;
- Relevant primary documents or artifacts, plus a discussion of a particular historical method well-suited to teaching about them;
- Lesson plans suitable for both middle and secondary level classrooms;
- Document-based questions and short bibliographies for further research on the topic.

This invaluable book is ideal for any aspiring or current teacher who wants to think critically about how to teach world history and make historical discussions come alive for students.

Barron's Passware Simon and Schuster
This book is a poignant celebration of grassroots empowerment as our contributors, people who just a short time ago thought of themselves as ordinary citizens, document their call to action when their children and their profession are on the line. Practicing teachers and parents who see the direct impact of education reform on young people and are looking for straightforward and accessible information to help them understand what is happening and acquire the tools for resistance will find direction in this text. Providing inspiration, as well as practical guidance on how to become active in reclaiming education this book covers topics including the corporate takeover of education, high stakes testing, Common Core Standards, teacher preparation, grassroots activist responses, and much more.

Drawing on a rich trove of documents, including correspondence not seen for 300 years, this study explores the emergence and growth of a remarkable global trade network operated by Armenian silk merchants from a small outpost in the Persian Empire. Based in New Julfa, Isfahan, in what is now Iran, these merchants operated a network of commercial settlements that stretched from London and Amsterdam to Manila and Acapulco. The New Julfan Armenians were the only Eurasian community that was able to operate simultaneously and successfully in all the major empires of the early modern world—both land-based Asian empires and the emerging sea-borne empires—astonishingly without the benefits of an imperial network and state that accompanied and facilitated European mercantile expansion during the same period. This book brings to light for the first time the trans-imperial cosmopolitan world of the New Julfans. Among other topics, it explores the effects of long distance trade on the organization of community life, the ethos of trust and cooperation that existed among merchants, and the importance of information networks and communication in the operation of early modern mercantile communities.

Diversity Amid Globalization Routledge
Designed for students to use in the classroom or at home to study and prepare for the New York State Regents exam on global studies.

Beyond the Bubble Test Routledge
Now in its 4th edition, this popular text for secondary social studies methods courses integrates discussions of educational goals and the nature of history and social studies with ideas for organizing social studies curricula, units, lessons, projects, and activities. A major theme throughout is that what teachers choose to teach and the way they teach reflect their broader understanding of society, history, and the purpose of social studies education. Advocating an inquiry and activity-based view of social studies teaching that respects the points of view of students and teachers, and based in practice and experience, it offers systematic support and open, honest advice for new teachers. Each chapter

addresses a broad question about social studies education; sub-chapters begin with narrower questions that direct attention to specific educational issues. Lesson ideas and materials in the book and online are especially designed to help new teachers to address common core learning standards, to work in inclusive settings, and to promote literacy and the use of technology in social studies classrooms. Chapters include highlighted Learning Activities, Teaching Activities, and Classroom Activities designed to provoke discussion and illustrate different approaches to teaching social studies, and conclude with recommendations for further reading and links to on-line essays about related social studies topics. Activities are followed by four categories: "Think it over," "Add your voice to the discussion," "Try it yourself," and "It ' s your classroom." All of these are supported with online teaching material. Designed for undergraduate and graduate pre-service social studies methods courses, this text is also useful for in-service training programs, as a reference for new social studies teachers, and as a resource for experienced social studies educators who are engaged in rethinking their teaching practice. New in the Fourth Edition Provides a number of new lesson ideas paired with online lesson plans and activity sheets in every chapter Takes a new focus on data-driven, standards-based instruction, especially in relation to the common core curriculum Addresses the interactive nature of learning in updated technology sections Reflects current trends in history education Includes more of what the author has learned from working teachers Offers a wealth of additional on-line material linked to the text

Surviving Chemistry Regents Exam: One Topic Review at a Time Teachers College Press

This fully revised and updated edition includes twelve new chapters on contemporary topics such as ecological democracy, Native studies, inquiry teaching, and Islamophobia. The Social Studies Curriculum, Fourth Edition updates the definitive overview of the issues teachers face when creating learning experiences for students in social studies. The book connects the diverse elements of the social studies curriculum—civic, global, social

issues—offering a unique and critical perspective that separates it from other texts. Completely updated, this book includes twelve new chapters on the history of the social studies; democratic social studies; citizenship education; anarchist inspired transformative social studies; patriotism; ecological democracy; Native studies; inquiry teaching; Islamophobia; capitalism and class struggle; gender, sex, sexuality, and youth experiences in school; and critical media literacy. All the chapters from the previous edition have been thoroughly revised and updated, including those on teaching social studies in the age of curriculum standardization and high-stakes testing, critical multicultural social studies, prejudice and racism, assessment, and teaching democracy. Readers are encouraged to reconsider their assumptions and understanding about the origins, purposes, nature, and possibilities of the social studies curriculum. E. Wayne Ross is Professor of Curriculum Studies at the University of British Columbia, Canada. He has written and edited many books, including (with Abraham P. DeLeon) *Critical Theories, Radical Pedagogies, and Social Education: New Perspectives for Social Studies Education*.

Teaching Recent Global History Arcade Publishing

This powerful and timely analysis takes stock of race and education sixty years after the historic Brown vs. Board of Education decision. This volume examines education as one of the most visible markers for racial disparities in the US as well as one of its most visible frontiers for racial justice. Featuring original research, educators ' insights, and perspectives from communities of color, it documents the complex impact of social /educational policy on social progress. Chapters on charter schools, curriculum content, performance measurement, and disproportionalities in special education referrals shed light on

entrenched inequities that must be confronted. The book also makes it clear that leveling the playing field calls for not only better schools, but also addressing pervasive social problems such as poverty and housing segregation. Included in the coverage: School Policy is Housing Policy: Deconcentrating Disadvantage to Address the Achievement Gap. Charter Schooling, Race Politics, and an Appeal to History. The Data Quality Movement for the Asian American and Pacific Islander community: an unresolved civil rights issue. Critical Ethnic Studies in High School Classrooms: Academic Achievement via Social Action. Mexican American Educational Stagnation: The Role of Generational Status, Parental Narratives and Educator Messages. p/pp Pinpointing crucial issues and opportunities for solutions, Race, Equity, and Education has immediate salience for educators and researchers studying the intersection of race and education.

Guilford Publications

Originally published as a special issue of the Journal of Education for Students Placed at Risk, this expanded text provides new insights into the successful, sustained implementation of Full-Service Community Schools (FSCSs) in the United States. Reviewing the Success of Full-Service Community Schools in the US documents the experiences of students, teachers, and communities involved in the establishment and growth of FSCSs. By considering how successful this reform strategy has been in meeting the needs of underserved communities, the text illustrates the potential these schools have to transform students' learning and outcomes. In particular, the studies illustrate the value these schools have in supporting low-income students and students of

color. At the same time, by interrogating the defining pillars of FSCSs — expanded learning opportunities, integrated services, family and community engagement, and collaborative leadership — chapters identify challenges that if left unattended, could limit the transformative potential of this reform strategy. This groundbreaking text will be of great interest to graduate and postgraduate students, researchers, academics, professionals, and policy makers in the fields of Educational Change and School Reform, Multicultural Education, Sociology of Education, Education Policy, and School Management and Administration.
