"Dr Lukasz Wroblewski's book *Culture Management: Strategy and Marketing Aspects* clearly recognises that the pressures on the cultural sector in the 21st Century are greater than ever before. Based on robust academic research within a practical industry context, this book addresses all the key issues related to marketing strategy and planning for the cultural industries. It will be an invaluable tool for managers, policy-makers and all those working in the creative and cultural world, and will help them to develop sound strategies for the future." Dr Kim Lehman, Tasmanian School of Business and Economics, University of Tasmania "Dr Wroblewski's book explains clearly what has changed to make the use of business models necessary, even in organizations which might have resisted in the past. Globalization has resulted in a population which understands and appreciates art and culture created in other countries. While it might be agreed that this is beneficial for society, it means that cultural arbitrators within a country no longer have the authority to dictate what is accepted as culture. Managers now understand that to gain the support of the public they must explain the benefits of consuming their cultural product." Dr Bonita M. Kolb, Professor Emeritus of Lycoming College in Pennsylvania "A thoughtful and penetrating analysis of culture management addressing marketing strategies and cultural institutions. An important 'must read' book for those involved in this exciting sector." Prof Adrian Payne, University of UNSW Business School, University of New South Wales

This book focuses on the development of strategies for the successful internationalization of large and medium-sized companies. Becoming international offers important opportunities for companies of all sizes, but in an increasingly complex environment, the strategic planning involved is also a challenge. The book addresses this, putting forward suggestions that allow large and medium-sized companies to profit from internationalization. After a comprehensive introduction to internationalization

and strategic planning, the authors make clear recommendations, suggesting detailed processes for developing international strategies. The book distinguishes between going global for new markets and internationalizing production and sourcing. For both, the book proposes procedures for performing meaningful strategic analyses and for developing successful international strategies. Lastly, it highlights the challenges faced by international companies and discusses useful decision processes. The book offers valuable insights for company executives, participants in Executive MBA programs, and master 's students.

Marketing: A Relationship Perspective is back for a second edition

and continues to set a benchmark for achievement in introductory marketing courses across Europe. It is a comprehensive, broad-based, and challenging basic marketing text, which describes and analyzes the basic concepts and strategic role of marketing and its practical application in managerial decision-making. It integrates the 'new' relationship approach into the traditional process of developing effective marketing plans. The book's structure fits to the marketing planning process of a company. Consequently, the book looks at the marketing management process from the perspective of both relational and transactional approach, suggesting that a company should, in any case, pursue an integrative and situational marketing management approach. Svend Hollensen's and Marc Opresnik's holistic approach covers both principles and practices, is drawn in equal measure from research and application, and is an ideal text for students, researchers, and practitioners alike.

What You Really Need to Know to Manage Your Marketing Activities
Pearson Education

The concept of value has been at the heart of marketing thought and practice. Marketers strive to develop a unique value proposition to satisfy the needs of customers in order to create a differentiated offering to targeted customers, be they end consumers or business users. It is the unique value delivered by products and services that defines firm 's competitive market positioning. Recent advances in marketing theory have enhanced the interpretation of value in terms of its types, manifestations and determinants. Value in marketing is delivered to customers, stakeholders, shareholders, ecosystems and society. While the literature has been unanimously emphasizing the economic interpretation of value, measured in money terms, marketing has been at the forefront of critical thinking bringing to the fore new meanings and interpretations of value that have unlocked the psychological, emotional, social and ecological value of products and services to customers. It is the marketing thought that has extended the understanding of value-in-use and has indisputably positioned value in context. Marketing has developed the notion of value delivered by intangible assets that can create much greater value than the tangible product and/or service. Marketing has unravelled the multi-layered nature of value to the customer and thus augmented the meanings and interpretations, as well as the analytical and practical potential of this notion. Consequently, we see the need to revisit the concept of value in marketing in order to address its complexity. This book sets to provide an insight in the concept of value in marketing in its contemporary interpretation and level of development. The aim is to offer an overview of debates and developments in our understanding of value in marketing that can raise the awareness of the scholarly and business communities of its pivotal importance for businesses and consumers. Value in Marketing presents reflections and analysis of value in marketing by consecutive generations of scholars who have made theoretical contribution to the contemporary understanding of the concept, its interpretations, dimensions and importance. The chapters address various issues including: customer value development, implications, and trajectories; intra-variable and inter-variable perspectives of value; the importance of the value concept in the international marketing context; value developed in networks that is intrinsically associated with knowledge creation in the internationalization, meanings and interpretations of value in diverse contexts that help us develop further the dimensions of the concept. We trust the book will be of interest to researchers, scholars and students in the fields of marketing management and international business, and to people who wish to have a better understand what marketing really brings to consumers.
