The Middle East is spinning out of control, but what does that mean to a simple fast-order cook in Central California? Everything-his family, his love life, his future, his purpose. And it may be that he means a great deal to the Middle East. Some are willing to kill him and others are willing to risk their lives to protect him. This adventure takes the reader to Turkey, Iran, and Arabia. Themes of historical religions of the Middle East, modern interpretations, truth, understanding, and what the future holds for this volatile region are interwoven throughout the book. Romance and its seeming impossibility provide a metaphor for all that is wonderful about this region, and all that may be suffocating hope. The unspoken question through most of the book asks is something more happening as this adventure unfolds?

Navigating the volatility, uncertainty, complexity, and ambiguity (VUCA) characterizing the business world in the 21st century requires a new paradigm focused on an integrated bottom line — planet, people, and profit (PPP). Global trends include resource scarcity and growing inequities in income, wealth, education, and healthcare. Stakeholders are demanding that organizations address systemic barriers to promote justice and equity within organizations and across broader social systems. Transformational change requires leadership to analyze internal and external systems through a social and environmental justice lens. Despite a growing focus on justice, equity, diversity, and inclusion, the imbalance of power remains within our institutions,

organizations, and social systems. To move the needle, leaders can turn to *Driving Justice, Equity, Diversity, and Inclusion*, which explains developing a North Star vision and creating a strategy to redesign organizational process and systems, as well as leveraging tools for data-driven decision-making. It presents a framework to build an inclusive organization as well as a model to engage and support senior and middle management beginning the process of capacity building and systemic change. By layering in AI and other technologies to support data-driven decision-making, the book guides leaders in navigating their organization's journey along the maturity continuum to achieve their North Star vision of becoming a just and equitable organization. The book also helps managers to Assess ecosystems and organizational systems that justice, equity, diversity, and inclusion impact Take a deeper dive into transformational and operational components to gain insights on the deep systemic realignment of the North Star vision Identify and engage with diverse stakeholders to gain perspective and understand issues crucial for transformative change Leverage people-centered design to create a process promoting diversity of voices and to better align outcomes with shared organizational vision Use data to drive decision-making and reduce bias by removing intuition from the decision-making

process Leverage the book's frameworks to drive collaborative systemic change Adapt insights highlighted in multiple interviews with DEI practitioners Benefit from lessons learned and best practices featured in the book's case studies This book features a primer, which is a quick reference guide to key terms, concepts, and definitions. It helps to define justice, equity, diversity, inclusion, and other key terms, such as unconscious bias, stereotypes, and microaggressions. It also features a toolkit, which includes checklists to help managers lead organizations to realize their own North Star vision.

applications by customizing solutions to meet specific requirements. This course is a hands-on tutorial on working with a real Dynamics NAV implementation. It begins by providing an insight into the different tools available to migrate data from client legacy systems into Microsoft Dynamics NAV. If you are already live with Microsoft Dynamics NAV, you will learn about upgrades and what to expect from them. We'll also show you how to implement additional or expanding functionalities within your existing Microsoft Dynamics NAV installation, perform data analysis, debug error messages, and implement free third-party add-ons to your existing installation. From here, you will be introduced to integrated development tools to make you a highly productive developer in the NAV environment. The course will serve as a comprehensive reference guide, complementing NAV's Help files. You will find this course really useful if you want to evaluate Microsoft Dynamics NAV's development capabilities or need to manage NAV-based projects. Additionally, you will also learn about the NAV application structure, the C/SIDE development environment, the C/AL language, the construction and uses of each object type, and how it all fits together. Moving on, you will be guided through the NAV way of solving problems. You will be introduced to patterns and the software NAV architecture and will then build an example application. Then, you will walk through the details of architectural patterns, design patterns, and implementation patterns and will also learn about anti-patterns and handling legacy code. You will learn how to build solutions using patterns. The course

offers premium, highly practical content on this recently released version of Dynamics NAV, and includes material from the following Packt books : Implementing Microsoft Dynamics NAV - Third Edition Programming Microsoft Dynamics™ NAV Learning Dynamics NAV Patterns Style and approach This course is for Dynamics NAV partners, developers, consultants, and end users who want to know everything about Dynamics NAV implementations and development.
