## *Effects of Financial Globalization on Developing Countries ...*

Summary: Developing countries face special risks that globalization and market reforms will exacerbate inequality, at least in the short run, and raise the political costs of inequality.

During that transition, more emphasis on minimizing and managing inequality would minimize the real risks of a protectionist and populist backlash.

Effects of Globalization on Developing Countries

## Globalization and Wealth Creation in Developing Countries

Globalization is an economic concept that works by easing the movement of goods and people across borders. To ease the process, all investments, trade, and markets get integrated, and barriers get minimized or eliminated, to ensure different nations enjoy the flow of goods

and services. Most In-depth Marketing and Digital Marketing Courses

Impact of Globalization on Developing Countries - PHDessay.com

From an economic standpoint, globalization is typically defined as the increase in the global trade of goods, services, capital, and technology. This growth in trade has been especially acute between developed countries like the United States and emerging markets , such as China.

## **Is Globalization Good or Bad for Developed Countries?**

Globalization can be argued as a tool

---

for economic growth, advancement and prosperity through co-operation between the developed and developing countries. The pro-globalization critics argue that the benefits that globalization brings to developing nations surpasses or outcasts the negative impacts caused by globalization and may even go a step further to state that it is the only source of hope for developing nations to prosper and stand out.

Globalization: A Framework for IMF Involvement - Issues Brief World Economic and Financial Surveys Series Research at the IMF: Effects of Financial Globalization on Developing Countries: Some Empirical Evidence Eswar Prasad, Kenneth Rogoff, Shang-Jin Wei and M. Ayhan Kose

To begin with, developing countries can get many economic benefits through globalization. People who live in developing countries can get more employment opportunities for globalization. This is because they can get jobs in other countries and can do business through the international trade and through the Internet. For example, some developing countries' economies have increased for globalization.
