Fearon's General Science Springer Science & Business Media

Traces the history of the United States from the arrival of the first explorers to the present day.

Consumer Math Prentice Hall

Written for advanced undergraduate and graduate students, this is the first textbook on international relations theory to take a specifically game-theoretic approach to the subject, and provide the material needed for students to understand the subject thoroughly, from its basic foundations to more complex models. International relations theory is presented and analysed using simple games, which allow students to grasp the concepts and mechanisms involved with the rationalist approach without the distraction of complicated mathematics. Chapter exercises reinforce key concepts and guide students to extend the models discussed. Drawing examples from international security, international political economy, and environmental negotiations, this introductory textbook examines a broad array of topics in international relations courses, including state preferences, normal form games, bargaining, uncertainty and communication, multilateral cooperation, and the impact of domestic politics.

Practical Mathematics for Consumers Globe Fearon

Consumers have always been concerned about the quality, and particularly the safety, of the foods they eat. In recent years this concern has taken on additional prominence. Consumer focus on food safety has been sharpened by reports about new risks, such as that posed by "mad cow" disease, and about more familiar sources of risk, such as food borne pathogens, pesticides, and hormones. At the same time, some consumers are increasingly interested in knowing more about how their food is produced and in selecting products based on production practices. Some of the questions consumers are asking include whether food is produced with the use of modern biotechnology, whether it is organically produced, how animals are treated in meat and egg production systems, and whether food is produced using traditional methods. Recent trends also show increased consumer demand for a variety of food products that are fresh, tasty, and available on a year-round basis. This has fostered increased global trade in food. For example, consumers in temperate climates such as North America are able to buy raspberries throughout the year, and Europeans can enjoy South American coffee. Trade in processed food products is actually increasing more rapidly than trade in agricultural commodities, further addressing the demand for variety among consumers.

Books in Print Supplement Akshay Sonthalia

Contains over 200 reproducible pages and teacher resources, including vocabulary review, skill practice, problem solving, and assessment for each chapter; teacher support for each chapter; basic skills review; and comprehensive test preparation that includes a diagnostic test, unit tests, and a final exam.
