In the study and appreciation of American history, and in understanding the crucial role played by firearms in that extraordinary saga, one of the most famous gunmakers is Winchester. Their products are so much in demand that they indisputably hold the title of the Blue Chips of gun collecting. And while a notable amount of literature on these marques has appeared in print, much of it from the period of post-World War II, there are still major categories which demand focused books. Such works are in response not only to the "need to know" from students, historians and collectors, but also are a powerful reflection of the ever-expanding explosion of interest in the magical world of firearms. The study of

arms is a highly visual, and technical, pursuit. Having the objects sitting on a page, as if they are on the reader's desk, is a true delight. Few photographers can equal those images of excellence. And no one today can match his combination of skill, aptitude and artistry at doing both text and photographs

From the Foreword Mark Shean's "Gun Sense" is in reality a series of numbered and un-numbered articles assembled into a book. In 2018, after one of Mark's License to Carry (LTC) classes, he was talking about wanting to take his blog and turn it into an E-book. There was a desire to be able to reach a wider audience and make it easier for his students to follow along with him/review the material. Mark Shean comes to readers with a combination of over 55 years of firearms, NRA LE Instructor and

Nuclear security experience. Though originally from Maine, Mark has been teaching the Massachusetts gun law class since 2000. "Gun Sense" is not so much a book you read from the first page to the last (even though you could and should), as much as it is a guide to topics on gun safety, Massachusetts gun law, your general rights as an American, op-eds and so on and so forth, that can apply anywhere. The synergy of this work is that Mark just started writing these articles as the topics came to him. These are ideas that came to him in the order that they are presented here, over years. There are sections that are redundant and cover the same material over again, for a reason. In compiling the over 50 independent pieces, we have tried to lend some help in organization by referencing other "Gun Sense" chapters, which would give you more information on a certain subject. Chances are if you have a question

when reading "Gun Sense" or taking Mark's class, the question will be answered by the time you finish reading the book or sitting in on the class. The good news is that Mark is a tangible and accessible guy. All you have to do is find his contact information at the end of this book in the "About the Author" section and if you have any questions, comments, concerns or general correspondence, Mark would be happy to field them. Also, if you are reading this book as a companion to his class, that is awesome and you'll find having this text handy while in class or before/after class will help reinforce the lessons he teaches. If you are reading this book and are thinking that you want some training, all the better. Reach out to Mark and he'd be happy to talk to you about a training session or teaching you the required class to obtain a Massachusetts Firearms Identification Card (FID) or License to Carry

(LTC). Included are Appendixes with helpful information and plenty of citations through the text. At the time of this writing, everything was accurate and up to date, but that does not mean it so shall remain.

Concerning Chapter 140 of Massachusetts General Law and also 527 Code of Massachusetts Regulations, be advised this is all subject to change, so always cross reference and ensure you have the up to date regulations. As with all citations and references in this text, they can and will change over time.

Nevertheless, it should also be useful to attorneys seeking basic information about the NFA and how the law has been interpreted by ATF. The book's Table of Contents will be helpful to the user in locating needed information. The Glock pistol is America's Gun. It has been rhapsodized by hip-hop artists and coveted by cops and crooks alike. Created in 1982 by Gaston Glock, the pistol arrived in America at a fortuitous time. Law enforcement agencies had concluded that their agents and officers, armed with standard six-round revolvers, were getting "outgunned" by drug dealers with semi-automatic pistols; they needed a new gun. With its lightweight plastic frame and large-capacity spring-action magazine, the Glock was the gun of the future. You could drop it underwater, toss it from a helicopter, or leave it out in the snow, and it would

still fire. It was reliable, accurate, lightweight, and cheaper to produce than Smith and Wesson's revolver. Filled with corporate intrigue, political maneuvering, Hollywood glitz, bloody shoot-outs—and an attempt on Gaston Glock's life by a former lieutenant—Glock is not only the inside account of how Glock the company went about marketing its pistol to police agencies and later the public, but also a compelling chronicle of the evolution of gun culture in America. The U.S. Army teamed up with cartoonist and graphic artist Will Eisner to produce teaching tools for U.S. soldiers in a medium that they could easily understand. *The M16A1 Rifle: Operation and Preventive Maintenance*, first printed in 1969, features a female narrator who instructs GIs on the proper care of their AR-15 (military name M16A1) rifles—firearms notorious for jamming and malfunctioning. More than a simple manual and step-by-step guide, this unconventional yet important military document tried to appeal to soldiers with suggestive chapter titles such as "How to Strip Your Baby," "What to Do in a Jam," "Sweet 16," and "All the Way with N é g l i g é ." A copy of the thirty-two-page booklet

was issued to nearly every soldier serving in Vietnam.

All Abraham's Children is Armand L. Mauss's long-awaited magnum opus on the evolution of traditional Mormon beliefs and practices concerning minorities. He examines how members of the Church of Jesus Christ of Latter-day Saints have defined themselves and others in terms of racial lineages. Mauss describes a complex process of the broadening of these self-defined lineages during the last part of the twentieth century as the modern Mormon church continued its world-wide expansion through massive missionary work. Mauss contends that Mormon constructions of racial identity have not necessarily affected actual behavior negatively and that in some cases Mormons have shown greater tolerance than other groups in the American mainstream. Employing a broad intellectual historical analysis to identify shifts in LDS behavior over time, *All Abraham's Children* is an important commentary on current models of Mormon historiography.

The growing concern over the number of accidental firearm shootings, especially those involving children, prompted passage of the initial handgun safety law which went into effect in 1994. The stated intent of the California Legislature in enacting the current FSC law is for persons who obtain firearms to have a basic familiarity with those firearms, including, but not limited to, the safe handling and storage of those firearms. The statutory authority for this program is contained in Penal Code sections 26840 and 31610 through 31700. These statutes mandate DOJ to develop, implement and maintain the FSC Program. Pursuant to Penal Code section 26840, a firearms dealer cannot deliver a firearm unless the person receiving the firearm presents a valid FSC, which is obtained by passing a written test on firearm safety. Prior to taking delivery of a firearm from a licensed firearms dealer, the purchaser/recipient must also successfully perform a safe handling demonstration with that firearm..
