These things are 2/3 of a Chevy six. Pretty much what works on a six works on a four. And there is a lot of interchange with some small blocks. 6 & 4 rods are slightly wider than V8 but use the same bearing. 153s use 2.0 181s use 2.1. Mains are the same. My 153 has a 181 crank and rods. 181 rods are hard to find cheap. They are not all the same.

The engine actually showed up in the 1962 Chevy II as a 153 I think. Digging in the cobwebs at teh back of my head there was a 153 4 cylinder a 194 6 cylinder a 230 6 cylinder (the 250 didn't show up till about 1965) and even the 283 V8. The 283 might not have been available till 63. Wikipedia Chevy II history here Roger DiRuscio Senior Member

Take a stroll down memory lane as we look back on the Chevrolet II/Nova 153 IL-4 engine. Originally the base powerplant for the 1962 Nova, the 153 went on to survive and thrive in other areas like boats, generators, and forklifts. A pretty interesting little motor.
