General Motors' legendary small-block
architecture, which was introduced 60
years ago for on-road vehicles and
continues to power through the 21st
century, is a workhorse in the marine
industry. Widely known as the "LS"
platform, a nickname given to the series by
enthusiasts who recognized the engines'
tremendous performance capabilities, the
Gen-IV remains a proven powertrain.

...
The Chevrolet 153 cu in engine was an inline-four engine designed in the early 1960s for use in the Chevy II. It is a four-cylinder variant of the third generation Chevrolet straight-six. After 1970 GM ceased

production of the 153 engine in North America because of low demand, but the engine continued to be used in cars in other markets around the world, notably South Africa and Brazil. The engine was also standard equipment in the Jeep DJ-5A—used by the United States Postal Service ...
