Maritime piracy is the cause of widespread international concern, and the number of pirate attacks has increased substantially in recent years. Many commercial vessels are inherently vulnerable to attack because of their size and relative slowness, and technological improvements have resulted in smaller crews on large vessels, whilst the absence of enforcement agencies in international waters has served only to make pirates more daring. Collaborative human-centric information support systems can significantly improve the ability of every nation to predict and prevent pirate attacks, or to recognize the nature and size of an attack rapidly when prevention fails, and improve the collective response to an emergency. This book presents the papers delivered at the NATO Advanced Study Institute (ASI) Prediction and Recognition of Piracy Efforts Using Collaborative Human-Centric Information Systems, held in Salamanca, Spain, in September 2011. A significant observation from previous NATO Advanced Study Institutes and Workshops was that domain experts responsible for maritime security were not fully aware of the wide variety of technological solutions available to enhance their support systems, and that although technology experts have a general understanding of the requirements in security systems, they often lacked knowledge concerning the operational constraints affecting those who implement security procedures. This ASI involved both technology and domain experts, as well as students from related fields of study. It offered an opportunity for them to discuss the issues surrounding the prediction, recognition and deterrence of maritime piracy, and will be of interest to all those whose work is related to this internationally important issue.

There have been major advances in technologies to support crisis response in the last few years. However, many aspects related to the efficient collection and integration of geo-information, applied

semantics and situation awareness for disaster management are still open. To advance the systems and make them intelligent, an extensive collaboration is required between emergency responders, disaster managers, system designers and researchers. To facilitate this process the Geo-information for Disaster Management (Gi4DM) conference has been organized since 2005. Gi4DM is coordinated by the Joint Board of Geospatial Information Societies (JB GIS) and the ad-hoc Committee on Risk and Disaster Management. This volume presents the results of the Gi4DM 2012 conference, held in Enschede, the Netherlands, on 13-15 December . It contains a selection of around 30 scientific and 25 best-practice peer-reviewed papers. The 2012 Gi4DM focuses on the intelligent use of geo-information, semantics and situation awareness.

Leonard Bourdon: The Career of a Revolutionary, 1754-1807 illustrates the ways in which one individual was affected by and influenced the long and turbulent course of the French Revolution. It also rescues an active, intelligent and interesting man from a prolonged period of scholarly neglect and redeems his reputation from being perceived as a particularly cruel revolutionary terrorist. Sydenham follows Bourdon ' s political career from the final days of the old monarchy through Bourdon ' s active participation in the Revolution. Bourdon was always aware that political development must be accompanied by educational change, and his lifelong interest in education is an integral part of his story. Bourdon left remarkably few personal papers. During the painstaking exploration for details of his life, several critical as well as unfamiliar events of the period have been illuminated, suggesting that similar misrepresentations of many other relatively unknown French revolutionaries have distorted current understanding of this period, crucial to the growth and development of modern democracy.

Who's Your Caddy? IOS Press

Official records produced by the armies of the United States and the Confederacy, and the executive branches of their respective governments, concerning the military operations of the Civil War, and prisoners of war or prisoners of state. Also annual reports of military departments, calls for troops, correspondence between national and state governments, correspondence between Union and Confederate officials. The final volume includes a synopsis, general index, special index for various military divisions, and background information on how these documents were collected and published. Accompanied by an atlas.

United States Congressional Serial Set Createspace Independent Publishing Platform

Zoo of Emotions is a read-aloud illustrated children's book that teaches simple and complex emotions using the alphabet, rhythmic prose and colorful illustrations. By combining kid-friendly artwork, roll-off-the-tongue rhymes, and a fun exploration of the alphabet, Zoo of Emotions is set to become a favorite bedtime classic.

Prediction and Recognition of Piracy Efforts Using Collaborative Human-Centric Information Systems Anchor

A Religious History of the American GI in World War II breaks new ground by recounting the armed forces' unprecedented efforts to meet the spiritual needs of the fifteen million men and women who served in World War II. For President Franklin D. Roosevelt and many GIs, religion remained a core American value that fortified their resolve in the fight against Axis tyranny. While combatants turned to fellow comrades for support, even more were sustained by prayer. GIs flocked to services, and when they mourned comrades

lost in battle, chaplains offered solace and underscored the righteousness of their cause. This study is essential reading for anyone seeking to understand the social history of the American GI during World War II. Drawing on an extensive range of letters, diaries, oral histories, and memoirs, G. Kurt Piehler challenges the conventional wisdom that portrays the American GI as a nonideological warrior. American GIs echoed the views of FDR, who saw a Nazi victory as a threat to religious freedom and recognized the antisemitic character of the regime. Official policies promoted a civil religion that stressed equality between Protestantism, Roman Catholicism, and Judaism. Many chaplains embraced this tri-faith vision and strived to meet the spiritual needs of all servicepeople regardless of their own denomination. While examples of bigotry, sectarianism, and intolerance remained, the armed forces fostered the free exercise of religion that promoted a respect for the plurality of American religious life among GIs.

A Compendium of the War of the Rebellion

The funniest and most popular sportswriter in America abandons his desk to caddy for some of the world ' s most famous golfers—and some celebrity duffers—with hilarious results in this New York Times bestseller. Who knows a golfer best? Who ' s with them every minute of every round, hears their muttering, knows whether they cheat? Their caddies, of course. So sportswriter Rick Reilly figured that he could learn a lot about the players and their game by caddying, even though he had absolutely no idea how to do it. Amazingly, some of the best golfers in the world—including Jack Nicklaus, David Duval, Tom Lehman, John Daly, Jill McGill of the LPGA tour, and Casey Martin—agreed to let Reilly carry their bags at actual PGA and LPGA Tour events. To round out his portrait of the golfing life, Reilly also persuaded Deepak Chopra and Donald Trump to take him on as a caddy, accompanied the four highest-rolling golf hustlers in Las Vegas around the course, and carried the bag for a blind golfer. Between his hilarious descriptions of his own ineptitude as a caddy and his insight into what makes the greats of golf so great, Reilly ' s wicked wit and an expert ' s eye provide readers with the next best thing to a great round of golf.
