**ABOUT THE BOOK** That's Just Not It is a contemporary fiction novella narrated by a young Filipina named Jesse Danielle or JD for short, who recalls her youth and her memories as a child before her mother and her sister migrated abroad while she decided to live with her father in her home country. A decade after, her sister comes back home to introduce her boyfriend and the past catches up to JD as she reflects on the paths she and her sister have taken. As JD reflects on the life she has so far lived, she comprehends what the real meaning of life is and what makes a person successful. Along the way, she makes realizations about issues of racial discrimination, xenocentrism, and prejudice. Rather than exploring the ideas of what life is, the existentialist topic of the novella is exploring what life isn't. Rather than describing what happiness looks like, the novella describes what it doesn't look like.

The new edition of Nursing Care Planning Made Incredibly Easy is the resource every student needs to master the art of care planning, including concept mapping. Starting with a review of the nursing process, this comprehensive resource provides the foundations needed to write practical, effective care plans for patients. It takes a step-by-step approach to the care planning process and builds the critical thinking skills needed to individualize care in the clinical setting. Special tips and information sections included

throughout the book help students incorporate evidence-based standards and rationales into their nursing interventions.

Ocular allergy is the most frequently diagnosed immune

disorder of the eye. This book examines the immunologic

reactions of ocular allergy in comparison to allergic skin

diseases, reviews recent advances in the pathophysiology

of ocular allergy and summarizes current clinical

knowledge and treatment strategies. Key Points - Explains the

epidemiology of ocular allergy, the role of the environment in

allergy, and the clinical manifestation of dermal and ocular allergic

disorders. - In-depth coverage of vernal and atopic keratoconjunctivitis, seasonal conjunctivitis, urticaria, idiopathic thrombocytopenic

purpura, hypersensitivity vasculitis, contact dermatitis and atopic dermatitis. - Thoroughly explains the immune cells involved in allergic reactions, including detailed chapters on basophils, mast cells, and B-cells. In addition, the allergic immune response in the asthmatic lung is covered. - Up-to-date coverage of treatment strategies for ocular allergy: mast cell stabilizing drugs, antihistamines, systemic immune therapy and immunomodulatory strategies.
