What do one hundred

sunbathing snails have in common with ten crabs in inner tubes? Check out this mirthful counting book with a focus on feet. If one is a snail and two is a person, we must be counting by feet!

Just follow the sign to the beach, where a bunch of fun-loving crabs, lounging dogs, gleeful insects, and

bewildered-looking snails obligingly offer their feet for counting in a number of silly, surprising combinations – from one to one hundred!

**Go Math!** McGraw-Hill

Golding's iconic 1954 novel, now with a new foreword by Lois Lowry, remains one of the greatest books ever written for young adults and an

unforgettable classic for readers of any age. This edition includes a new Suggestions for Further Reading by Jennifer Buehler. At the dawn of the next world war, a plane crashes on an uncharted island, stranding a group of schoolboys. At first, with no adult supervision, their freedom is something to celebrate. This far from civilization they can do anything they want. Anything. But as order collapses, as strange howls echo in the night, as terror begins its reign, the hope of adventure seems as far removed from reality as the hope of being rescued.

**Anatomy & Physiology** McDougal Littell/Houghton Mifflin

The God Delusion caused a sensation when it was published in 2006. Within weeks it became the most hotly debated topic, with Dawkins himself branded as either saint or sinner for presenting his hard-hitting, impassioned rebuttal of religion of all types. His argument could hardly be more topical. While Europe is becoming increasingly secularized, the rise of religious fundamentalism, whether in the Middle East or Middle America, is dramatically and dangerously dividing opinion around the world. In America, and elsewhere, a vigorous dispute between 'intelligent design' and Darwinism is seriously undermining and restricting the teaching of science. In

from medieval times still serves to abuse basic human rights such as women's and gay rights. And all from a belief in a God whose existence lacks evidence of any kind. Dawkins attacks God in all his forms. He eviscerates the major arguments for religion and demonstrates the supreme improbability of a supreme being. He shows how religion fuels war, foments bigotry and abuses children. The God Delusion is a brilliantly argued, fascinating polemic that will be required reading for anyone interested in this most emotional and important subject.

*Glencoe Math 2016, Course 2 Student Edition* Saxon Pub High school textbook on pre-algebra mathematics.

Go Math! Grade K Penguin

Teaches numbers 0 to 20, sequencing, shapes and patterns, position words, graphing, time and money concepts.
