In 2021, the United
States Census Bureau
reported that in 2020,
during the rise of the
global health pandemic
COVID-19,

homeschooling among Black families increased five-fold. However, Black families had begun choosing to homeschool even before COVID-19 led to school closures and disrupted traditional school spaces.

Homeschooling Black Children in the US: Theory, Practice and Popular Culture offers an insightful look at the growing practice of homeschooling by Black families through this timely collection of articles by education practitioners, researchers, homeschooling parents and homeschooled children. *Homeschooling Black Children in the US: Theory, Practice and Popular Culture* honestly presents how systemic racism and other factors

influence the decision of Black families to homeschool. In addition, the book chapters illustrate in different ways how self-determination manifests within the homeschooling practice. Researchers Khadijah Ali-Coleman and Cheryl Fields-Smith have edited a compilation of work that explores the varied experiences of parents homeschooling Black children before, during and after COVID-19. From veteran homeschooling parents sharing their practice to researchers reporting their data collected pre-COVID, this anthology of work presents an overview that gives substantive insight into what the practice of homeschooling looks like for many Black families in

the United States.

Eureka Math is a comprehensive, content-rich PreK-12 curriculum that follows the focus and coherence of the Common Core State Standards in Mathematics (CCSSM) and carefully sequences the mathematical progressions into expertly crafted instructional modules. The companion Study Guides to Eureka Math gather the key components of the curriculum for each grade into a single location, unpacking the standards in detail so that both

users and non-users of Eureka Math can benefit equally from the content presented. Each of the Eureka Math Curriculum Study Guides includes narratives that provide educators with an overview of what students should be learning throughout the year, information on alignment to the instructional shifts and the standards, design of curricular components, approaches to differentiated instruction, and descriptions of mathematical models. The Study Guides can serve as either a self-study professional development resource

The first books to present specific guidance for teaching the Common Core State Standards Forty-three states plus the District of Columbia and the U.S. Virgin Islands have signed on to adopt the Common Core

State Standards (CCSS). The need for curriculum guides to assist teachers in helping students meet these standards has become imperative. Created by teachers, for teachers, the research-based curriculum maps in this book present a comprehensive, coherent sequence of thematic units for teaching the skills outlined in the CCSS for English language arts in Grades K-5. The maps address every standard in the CCSS, yet are flexible and adaptable to accommodate diverse teaching styles. Each grade is broken down into six units that include focus standards, suggested works, sample activities and assessments, lesson plans, and more. Teachers can use the maps to plan their year and craft their own more detailed lesson plans. Any teacher, school, or district that chooses to follow the Common Core maps can be confident that they are adhering to the standards.

The idea behind Life of Fred is that if students have an enjoyable experience and have fun doing

their math, they will remember it and use it and have a good taste in their math about the whole subject. The sub-title on each of his math books is "As Serious As it Needs to Be". And that is just the point: math doesn't need to be horrid and dry. This is math—just as serious as it needs to be—and I can tell you from my child's smiles and chuckles, that's not very serious at all! As a bonus, these books are very low priced compared to any other math books on the market. (Compare to Saxon at 50-70). If you have a creative child who is languishing on traditional math programs, try Life of Fred! Math, As Serious As it Needs to Be!

In this groundbreaking and highly practical book, Number Sense Routines: Building Numerical Literacy Every Day in Grades K-3, author Jessica Shumway proposes that all children have innate number sense which can be developed through daily exercise. Shumway created a series of math routines designed to help young students strengthen and build their facility

with numbers. These quick 5, 10, or 15 minute exercises are easy to implement as an add-on to any elementary math curriculum. Understanding Number Sense: Students with strong number sense understand numbers, how to subitize, relationships among numbers, and number systems. They make reasonable estimates, compute fluently, use reasoning strategies, and use visual models to solve problems. Number Sense Routines supports the early learner by instilling the importance of daily warm-ups and explains how they benefit developing math minds for long-term learning. Real Classroom Examples: Shumway compiled her classroom observations from around the country. She includes conversations among students who practice number sense routines to illustrate them in action, how children's number sense develops with daily use, and math strategies students learn as they develop their numerical literacy through self-paced practice. Assessment Strategies: Number Sense Routines demonstrates the importance of

listening to your students and knowing what to look for. Teachers will gain a deeper understanding of the underlying math skills and strategies students learn as they develop numerical literacy. Shumway writes, "As you read, you will step into various classrooms and listen in on students' conversations, which I hope will give you insight into the power of number sense routines and the impact they have on students' number sense development. My hope is that going into the classroom, into students' conversations, and into their thought processes, you will come away with new ideas and tools to use in your own classroom."
