you've been asking for An unprecedented pandemic may take the teacher out of the classroom, but it doesn't take the classroom out of the teacher! Now that you're making the shift to online teaching, it's time to answer your biggest questions about remote, digitally based instruction: How do I build and nurture relationships with students and their at-home adults from afar? How do I adapt my best teaching to an online setting? How do I keep a focus on students and their needs when they aren't in front of me? Jennifer Serravallo's *Connecting with Students Online* gives you concise, doable answers based on her own experiences and those of the teachers,

administrators, and coaches she has communicated with during the pandemic. Focusing on the vital importance of the teacher-student connection, Jen guides you to: effectively prioritize what matters most during remote, online instruction schedule your day and your students' to maximize teaching and learning (and avoid burnout) streamline curricular units and roll them out digitally record highly engaging short lessons that students will enjoy and learn from confer, working with small groups, and drive learning through independent practice partner with the adults in a student's home to support your work with their child. My Students Can't Write!" Why You Need a Writing Revolution in Your Classroom and How to Lead It. The Writing Revolution (TWR) provides a clear method of instruction that you can use no matter what subject or grade level you teach. The model, also known as The Hochman Method, has demonstrated, over and over, that it can turn weak writers into strong communicators by focusing on specific techniques that match their needs and by providing them with targeted feedback. Insurmountable as the challenges faced by many students may seem, TWR can make a dramatic difference. And the method does more than improve writing skills.</p> |

It also helps: Boost reading  
comprehension Improve  
organizational and study skills

Enhance speaking abilities

Develop analytical capabilities

TWR is as much a method of  
teaching content as it is a method  
of teaching writing. There's no  
separate writing block and no  
separate writing curriculum.

Instead, teachers of all subjects  
adapt the TWR strategies and  
activities to their current  
curriculum and weave them into  
their content instruction. But  
perhaps what's most revolutionary  
about the TWR method is that it  
takes the mystery out of learning  
to write well. It breaks the writing  
process down into manageable  
chunks and then has students

practice the chunks they need,  
repeatedly, while also learning  
content.
