Amelia, daughter of the last independent King of Danhome, King Gbehanzin, is the apple of her father's eye, loved beyond measure by her mother, and overprotected by her siblings. She searches for her place within the palace amidst conspirators and traitors to the Kingdom. Just when Amelia begins to feel at home in her role as a Princess, a well-kept secret shatters the perfect life she knows. Someone else within the palace also knows and does everything to bring the secret to light. A struggle between good and evil ensues causing

Amelia to leave all that she knows and loves. She must flee Danhome with her brother, to south-western Nigeria. In a faraway land, she finds the love of a new family and God. The well-kept secret thought to have been dead and buried, resurrects with the flash of a thread of gold beads. Amelia must fight for her life and what is left of her soul. Set during the French-Danhome war of the late 1890s in Benin Republic and early 1900s in Abeokuta and Lagos, South-Western Nigeria, Thread of Gold Beads is a delicate love story, and coming of age of a young girl. It clearly depicts the strength of the human spirit in the face of adversities.

A time traveling cave. A vicious band of miners...and pure gold. When West Virginia teenagers Emma and Brody promised their neighbor, a famous geologist, to help rebuild his decimated rock and mineral collection for a museum display, they didn't know they would be in for the magical ride of a lifetime. After a successful trip to 1775 England where they collected the rare Blue John Fluorite, the teens are quick to jump at the chance to travel to the

California Gold Rush in 1851. When they arrive at the Gold Rush and meet an old acquaintance, they think the mission will be easy until they realize their friend may not be able to help them at all. When their actions in the past erase their future, can Emma and Brody right the wrong? With a hostile group of miners hot on their trail, Brody and Emma must collect the gold, save their friends, and salvage the future before it is too late. Rusher's Gold is the second book in the middle grade adventure/sci-fi series Crystal Cave Adventures. If you like adventure and time travel mixed with your geology, then you'll love Tracy Diane's exciting series.	What's so tough about building a solar collector? Most people think it's time they tried to do their part at lowering their monthly utility bills or curbing climate change, but they suspect that their dream of building a hot water solar collector is more than they can handle. In some cases, this may be true. However, if you have already performed your own plumbing repairs, this project may not be as difficult as and more affordable than you imagine. This down-to-earth guide can show you just how possible such a project can be. With simple step-by-step instructions, fifty-six clear illustrations, and a complete parts list from a major hardware store, you may fulfill your dream of going solar

sooner than you think. This is an excellent book with clear and well thought out plans. With a little investment of time and the parts listed, you will have a worthy product that will save money and provide satisfaction. A. J. Shea I am very impressed with the plans for this solar hot water system. I think it was easy to understand and complete with material lists and where to get them. I am looking forward to building one soon. Dean Cardin For anyone wanting to build their own solar collector, this is a great tool. Like others have said, follow the directions with respect to the materials specified.

Awaken one...awaken them all. Insomniac Piper Laurel focuses on the simple things, the feel-good things. She likes her coffee black, her wine cheap, and her men gone by morning. But when her last living relative dies, she must confront the feel-bad things. She's the last Laurel, she's almost thirty, and she's completely alone. When she returns to her sleepy seaside hometown, her ex is still as yummy as ever, and a familiar-seeming stranger is also there to tug at her heartstrings. But a love triangle isn't the only thing waiting for her. The immortal Anik has spent centuries plotting to claim the last Laurel--and a lot of innocent souls in the bargain. To survive Anik and the Realm

Wars, Piper must forget her version of reality and awaken to her destiny as a Seekin, Guardian of Souls. With two men vying for her heart and hellhounds on her heels, Piper must decide who she trusts and who she loves while embracing her destiny with her eyes wide open.

International tensions around water are rising in many of the world's most volatile regions.

The policy recipe pursued by the West, and imposed on governments elsewhere, is to pass control over water to private interests, which simply accelerates the cycle of inequality and deprivation. California, as well as China, South Africa, Mexico and countries on every continent already face a crisis. This book exposes the enormity of the problem, the dangers of the proposed solution and the alternative, which is to recognize access to water as a fundamental human right, not dependent on ability to pay.

Red Water, Black Gold: The Canadian River in Texas 1920–1999 tells the story of

the Canadian River in the Texas Panhandle. It is a tale of grand designs, high hopes, deep holes, politics, fishing, follies, foibles, and environmental change. Although efforts had been made to tap the Canadian River's waters before 1920, the discovery of oil in the Panhandle gave new urgency to the search for permanent water supplies. Additionally, the spread of groundwater irrigation amid the discovery of the limits of Ogallala Aquifer spurred regional interests to tap the Canadian. But overestimates of the river's flow and unfamiliarity with the critical role groundwater played in maintaining that flow led to complications and frustrations, culminating in a lawsuit over the location of the banks of a seemingly waterless river. This book is a valuable addition to the water history of

Texas and the American West and to the growing body of worldwide regional water histories. Combining traditional historical sources with hydrology, climatology, and geology, *Red Water, Black Gold* complicates the traditional story of top-down water management as well as telling the thus-far untold story of the Canadian River in Texas.

Acclaimed sci-fi author Alan E. Nourse offers up an exciting tale of treachery, adventure, and vast wealth in the novel *Gold in the Sky*. The story unfolds among the rarefied and rough-and-tumble crews who mine the surface of asteroids for valuable metals and minerals. Much like the lawless mining towns of the Old West, these groups are made up of rapacious types who will stop at nothing to strike it rich.

“Probably the most eloquent call to arms we’re likely to hear about the politics of water” (The Globe and Mail, Toronto). In this “chilling, in-depth examination of a rapidly emerging global crisis,” Maude Barlow and Tony Clarke, two of the most active opponents to the privatization of water show how, contrary to received wisdom, water mainly flows uphill to the wealthy (In These Times). Our most basic resource may one day be limited: Our consumption doubles every twenty years—twice the rate of population increase. At the same time, increasingly

transnational corporations are plotting to control the world’s dwindling water supply. In England and France, where water has already been privatized, rates have soared, and water shortages have been severe. The major bottled-water producers—Perrier, Evian, Naya, and now Coca-Cola and PepsiCo—are part of one of the fastest-growing and least-regulated industries, buying up freshwater rights and drying up crucial supplies. A truly shocking exposé, Blue Gold shows in frightening detail why, as the vice president of the World Bank has pronounced, “The wars of the next century will be about water.” “Maude Barlow and Tony Clarke combine visionary intellect with muckraking

research and a concrete plan for action.” —Naomi Klein, author of *The Battle for Paradise* “A sobering, in-depth look at the growing scarcity of fresh water and the increasing privatization and corporate control of this nonrenewable resource.” —Library Journal “An angry and persuasive account.” —Bloomberg Businessweek “The dire scenarios laid out in this comprehensive book are truly frightening.” —The San Diego Union-Tribune

Adsorption of Water on Gold Routledge

The behaviour of gold in sedimentary, magmatic and postmagmatic processes are studied and 40 gold-bearing minerals including ten which were recently discovered are described. The results are

presented of new experimental studies on phase relations in gold-sulphide systems. The solubility & form of gold migration in high-temperature chloride, sulphide and arsenic solutions are determined. Based on the new data, the genesis of gold deposits is studied and a geochemical classification proposed. This book is designed for specialists in the field of gold chemistry, geochemistry and mineralogy and for field geologists surveying and prospecting for gold.

The movement to implement market-based approaches to allocating water is gaining ground across California and in other western states. In *Rivers of Gold*, Brent M. Haddad explains the concept of water markets and the economic

theory undergirding them. He shows how some water markets have worked -- and others have failed -- and gives the reader the analytic tools necessary to understand why. *Rivers of Gold* is the first book to provide a detailed examination of water markets and the institutional design issues associated with them.
