The Handbook of Critical Literacies Macmillan
Discusses how to select and

use binoculars and telescopes, how to observe planets, meteors, comets, and other celestial bodies, and how to use star charts.

You've Seen the Castles... Now What? Routledge

As the world becomes more interconnected through travel and electronic communication, many believe that physical places will become less important. But as Mario Pol è se argues in The Wealth and Poverty of Regions, geography will matter more than ever before in a world where distance is allegedly dead. This provocative book surveys the globe, from London and Cape Town to New York and Beijing, contending that

regions rise—or fall—due to their location, not only within nations but also on the world map. Polèse reveals how concentrations of industries and populations in specific locales often result in minor advantages that accumulate over time, resulting in reduced prices, improved transportation networks, increased diversity, and not least of all, “buzz” —the excitement and vitality that attracts ambitious people. *The Wealth and Poverty of Regions* maps out how a heady mix of size, infrastructure, proximity, and cost will determine which urban centers become the thriving metropolises of

the future, and which become the deserted cities of the past. Engagingly written, the book provides insight to the past, present, and future of regions. *A Guide for Investors and Developers* Chronicle Books
Thirteen-year-old Sophia Tims, with her friend Theo, continues to search for her parents, explorers who have vanished as the borders shift within a world transformed by the Great Disruption of 1799.

This joyful and lyrical picture book from New York Times bestselling author Eva Chen and illustrator Sophie Diao is a moving ode to the immigrant experience, as well as a manifesto of self-love for Chinese American children. What do you see when you look in

the mirror, Mei? Do you see beauty? We see eyes that point toward the sun, that give us the warmth and joy of a thousand rays when you smile. We see hair as inky black and smooth as a peaceful night sky. We see skin brushed with gold. Praise for *I Am Golden*: "[A] richly metaphoric celebration of Chinese American identity ... Luminous, gently textured digital art by Diao includes thoughtful, recognizably Chinese cues that add further dimension ... A loving, affecting tribute to how children of immigrants can serve as bridges and torchbearers for their communities." —Publishers Weekly, starred review "From the outset, this gorgeous picture book exudes joy and celebration of identity. Through dazzling illustrations, Diao brings to exuberant life best-selling Chinese American author Chen's message of finding love and power in one's differences. ... This powerful and uplifting story captures [Chinese] American joy and is a definite must-read." —Booklist, starred review "Perfectly matched text and illustration ... Every gorgeous spread in Chen and Diao's co-creation maintains this exceptional and precise text and art symbiosis. ... Chen and Diao weave the inherent value of the child throughout, aiming to encourage Asian American children to claim, 'I am golden.'" —Shelf

Includes gorgeous,

accurate, full-cover illustrations and little-known facts about these extraordinary, overlooked animals. **Southwest** Golden Guides from Saint Martin's Press Compared to other regions, Europe and Central Asia are by far the oldest. Moreover, population aging is set to accelerate further over the coming decades as large segments turn old. Additionally, some countries such as Russia and certain Eastern European countries are facing a shrinkage of their population. Against this backdrop, this

report investigates what stands in the way of societies reaping the full benefits of increased longevity—that is, longer lives and potentially prolonged payoffs from human capital—and what can help to mitigate the possible negative impacts of a smaller and older workforce. Beginning with a focus on demographic trends, the report puts the rapid decline in fertility and contrasting migration trends in the region in a historical

perspective and looks forward to the varying paths that population change may follow in the region. Next, it examines the evidence on the likely impact of demographic change on growth and savings, the labor force, firm and economy-wide innovation, poverty and inequality, and intergenerational solidarity. Finally, the report goes beyond diagnostics and puts an emphasis on what we know regarding successful policy interventions, presenting evidence on what has and has

not worked in the past.

Fossils University of Chicago Press
Provides information on the history of the development of life on earth, details of the typical plants and animals of significant geological areas, and maps of areas where fossils can be found. *The Pacific Northwest* Feiwel & Friends
Fourth in the Kennel Club Books' Classics series, The Golden Retriever recognizes the ever-popular all-American breed in this one spectacular volume. Written by author, breeder, and judge, Jeffrey G. Pepper, this book's engaging chapters on everything from the breed's accomplishments in performance events, to their participation as

service dogs make it much more than just "another breed book." With more than 100 vintage and modern photographs of the breed, this book is a must-have for every Golden owner.

A Muslim Book of Colors Penguin

As a botanist, Robin Wall Kimmerer has been trained to ask questions of nature with the tools of science. As a member of the Citizen Potawatomi Nation, she embraces the notion that plants and animals are our oldest teachers. In *Braiding Sweetgrass*, Kimmerer brings these two lenses of knowledge together to take us on "a journey that is every bit as mythic as it is scientific,

as sacred as it is historical, as clever as it is wise"

(Elizabeth Gilbert).

Drawing on her life as an indigenous scientist, and as a woman, Kimmerer shows how other living beings—asters and goldenrod, strawberries and squash, salamanders, algae, and sweetgrass—offer us gifts and lessons, even if we've forgotten how to hear their voices. In reflections that range from the creation of Turtle Island to the forces that threaten its flourishing today, she circles toward a central argument: that the awakening of ecological consciousness

requires the acknowledgment and celebration of our reciprocal relationship with the rest of the living world. For only when we can hear the languages of other beings will we be capable of understanding the generosity of the earth, and learn to give our own gifts in return.

The Sky Observer's Guide EB5 Investors Magazine

Self-interest, economic efficiency and private property rights are among the most basic assumptions of market economics. But can an economic theory built on these assumptions alone provide

adequate insight into human nature, motivation and ultimate goals to guide our economic life? John Stapleford says no along with those economists who recognize the limits of their discipline. He insightfully shows us in detail how ethics are inextricably intertwined with economic life and analysis. Writing from a Christian ethical perspective, he interacts with seven standard introductory economics texts, exploring the moral challenges imbedded in various macro-, micro- and international economic theories and outlining a faithful

response to them. Among the important ethical issues addressed are possibilities and perils of economic growth the role of government in the economy the growth of work and loss of leisure lending and borrowing poverty and distributive justice environmental stewardship business and social responsibility legalized gambling the pornography industry debt relief for less developed countries the economics of immigration population control Keyed to seven of the most widely used introductory economics texts--Gwartney,

Stroup & Sobel; Mankiw; Mansfield & Behravesh; McConnell & Brue; Miller; Samuelson & Nordhaus; and Stiglitz--this book will be especially useful for introductory courses in economics. *Birds of Golden Gate Park* Routledge California Summits guides readers to 50 beautiful, attainable peak hikes. Hikers can summit most in a day, and sometimes in just a few hours, with a minimum of experience and gear. Everyone from families to experienced peak-baggers will find something to love. Hike up scenic

Mount Tamalpais overlooking San Francisco Bay, Yosemite National Park's grand Clouds Rest with its incomparable view of Half Dome, and snowcapped Mount Shasta, the state's northern jewel, among others. Stunning color photography and detailed hike descriptions provide inspiration and information for hikers of all ages and experience levels.

The Handbook of
Critical Literacies
aims to answer the
timely question:
what are the social
responsibilities of
critical literacy
academics,
researchers, and
teachers in today's
world? Critical
literacies are
classically
understood as ways
to interrogate texts
and contexts to
address injustices
and they are an
essential literacy
practice. Organized
into thematic and
regional sections,
this handbook
provides substantive
definitions of
critical literacies
across fields and
geographies, surveys
of critical literacy

work in over 23
countries and
regions, and
overviews of
research, practice,
and conceptual
connections to
established and
emerging theoretical
frameworks. The
chapters on global
critical literacy
practices include
research on language
acquisition, the
teaching of
literature and
English language
arts, Youth
Participatory Action
Research,
environmental justice
movements, and more.
This pivotal handbook
enables new and
established
researchers to
position their
studies within highly
relevant directions

in the field and engage, organize, disrupt, and build as we work for more sustainable social and material relations. A groundbreaking text, this handbook is a definitive resource and an essential companion for students, researchers, and scholars in the field.

The Golden Specific

InterVarsity Press

This book illustrates in full color 423 of the most common, widespread, important, or unusual North American species of Lepidoptera.

The Golden Book of Fortune-Telling UNC

Press Books

The Golden Gate Park National Recreation Area is the permanent

or migratory home of over 250 species of birds. This beautifully illustrated guide highlights over 140 familiar and unique species and includes a map of the park.

Laminated for durability, this lightweight, pocket-sized folding guide is an excellent source of portable information and ideal for field use by visitors and residents alike. Researched by the Audubon Society of Golden Gate.

Golden Domes and Silver Lanterns

McGraw Hill

Professional

Comprehensive and authoritative, this guide combines and updates two smaller, long-trusted regional books to provide seamless

coverage of the entire California coast from just outside the Golden Gate Bridge to Mexico, with special attention given to the popular offshore islands between Point Conception and San Diego. Brian Fagan draws upon more than three decades of experience sailing those waters under all conditions to offer the definitive cruising guide for both sailors and powerboaters.
