How to Research Good Reasoning Matters!: A Constructive Approach to Critical Thinking

The Handbook of the Logic of Argument and Inference is an authoritative reference work in a single volume, designed for the attention of senior undergraduates, graduate students and researchers in all the leading research areas concerned with the logic of practical argument and inference. After an introductory chapter, the role of standard logics is surveyed in two chapters. These chapters can serve as a mini-course for interested readers, in deductive and inductive logic, or as a refresher. Then follow two chapters of criticism; one the internal critique and the other the empirical critique. The first deals with objections to

standard logics (as theories of argument and inference) arising from the research programme in philosophical logic. The second canvasses criticisms arising from work in cognitive and experimental psychology. The next five chapters deal with developments in dialogue logic, interrogative logic, informal logic, probability logic and artificial intelligence. The last chapter surveys formal approaches to practical reasoning and anticipates possible future developments. Taken as a whole the Handbook is a single-volume indication of the present state of the logic of argument and inference at its conceptual and theoretical best. Future editions will periodically incorporate significant new developments.

J. Anthony Blair is a prominent international figure in argumentation studies. He is among the originators of informal logic, an author of textbooks on the informal logic approach to argument analysis and evaluation and on critical thinking, and a founder and editor of the journal *Informal Logic*. Blair is widely recognized among the leaders in the field for contributing formative ideas to the argumentation literature of the last few decades. This selection of key works provides insights into the history of the field of argumentation theory and various related disciplines. It

illuminates the central debates and presents core ideas in four main areas: Critical Thinking, Informal Logic, Argument Theory and Logic, Dialectic and Rhetoric.

Springer Science & Business Media

Business Law, 5th Edition (James et al.) is written for business students to provide a clear and accessible introduction to the legal system. Business law courses are the first exposure to law for many business students and the first time they are obliged to think deeply about the discipline. This updated edition presents business law in a practical context rather than the

doctrinal context that many major legal publishers use. The Business Law interactive e-text features a range of instructional media content designed to provide students with an engaging learning experience. This includes practitioner videos from Herbert Smith Freehills, animated work problems and questions with immediate feedback. This new edition is a unique resource that can form the basis of a blended learning solution for lecturers.

The Real Principles of Catholics ... Fifth Edition Springer

Good Reasoning Matters!: A Constructive Approach to Critical Thinking, fifth edition, offers a straightforward and

practical introduction to the principles of good reasoning. In addition to examining the most common features of faulty reasoning, the text introduces a variety of argument schemes and rhetorical techniques that will help students solve problems and construct sound arguments. Extensive exercises and examples taken from sources such as social media sites, newspapers, and topical news articles encourage students to consider a wide range of views and perspectives. With new features including a glossary, chapter summaries, and extensive revised exercises throughout, *Good Reasoning Matters!* is an essential text for courses in critical

reasoning.

Rhetorical and Argumentative Perspectives

Walter de Gruyter

This book brings together in one place David Hitchcock's most significant published articles on reasoning and argument. In seven new chapters he updates his thinking in the light of subsequent scholarship.

Collectively, the papers articulate a distinctive position in the philosophy of argumentation. Among other things, the author:• develops an account of “material consequence” that permits evaluation of inferences without problematic postulation of unstated premises. • updates his recursive definition of argument that accommodates chaining and embedding of arguments and allows any type of illocutionary act to be a conclusion. • advances a general theory of relevance. • provides comprehensive frameworks for evaluating inferences in reasoning by analogy, means-end reasoning, and appeals to considerations or criteria. • argues that none of the forms of arguing ad hominem is a fallacy. • describes proven methods of teaching critical thinking effectively.

Critical Thinking
5th edition Houghton Mifflin Harcourt

In recent decades, many philosophers have considered the strengths and weaknesses of a virtue-centered approach to moral theory. Much less attention has been given to how such an approach bears on issues in applied ethics. The essays in this volume apply a virtue-centered

perspective to a variety of contemporary moral issues, and in so doing offer a fresh and illuminating perspective. Some of the essays focus on a particular virtue and its application to one or more realms of applied ethics, such as temperance and sex or humility and environmental ethics. Other chapters focus on an issue in applied ethics and bring several virtues into a discussion of that issue or realm of life, such as sport, education, and business. Finally, several of the chapters engage relevant psychological research as well as current neuroscience, which enhances the strength of the philosophical arguments.

What do we know about the world? Rhetorical and Argumentative Perspectives is a book trying to answer the title question by contributing to rhetorical and argumentative studies. It consists of papers presented at the "First International Conference on Rhetoric in Croatia: the Days of Ivo S?karic?" in May, 2012, and subsequently revised for publication. Through a variety of different routs, the papers explore the role of rhetoric and argumentation in various types of public discourse and

present interdisciplinary work on communication: connecting linguists, phoneticians, philosophers, law experts and communication scientists in the common ground of rhetoric and argumentation.. The Conference was organized with the intent of paying respect to the Croatian rhetorician and professor emeritus Ivo S?karic? who was the first to introduce rhetoric at the Department of Phonetics at the Faculty of Humanities and Social Sciences, University of Zagreb.

A Variety of Contributions to Argumentation Theory

Springer Science & Business Media

Open publication This unique volume offers an overview of the

diversity in research on communication: including perspectives from biology, sociality, economics, norms and human development. It includes general social science and humanities approaches to communication, from systems theory to cultural theory, as well as perspectives more specifically related to communication acts, such as linguistics and cognition. The volume also features chapters on the participants and various elements in communication processes, on possible effects and on wider consequences of mediation [with technical media]. The scope of the contributions is global, and the volume is relevant to both

the empirical and the philosophical traditions in human sciences. Designed as a stand-alone collection to engage undergraduates as well as postgraduates and academics, this is also the first book in, and an introduction to, the de Gruyter Mouton multi-volume Handbooks of Communication Science.

This 664 page law and logic book contains the most comprehensive and detailed description of the composition of argument ad hominem ever published, revealing

this form of argument to be a far broader fallacy than was previously known. Like perjury, argument ad hominem can deceive juries and cause unjust trial verdicts. There is, fortunately, already a criminal law against perjury, but, unfortunately, there is currently no law that expressly prohibits argument ad hominem in trials. The book includes the text of a proposed criminal law that expressly prohibits argument ad hominem in trials, and shows the necessity of such a law to counter effectively this quite common form of injustice in jury trials. Argumentation Machines

Disha Publications

Recent work in argumentation theory has emphasized the nature of arguers and arguments along with various theoretical perspectives. Less attention has been given to the third feature of any argumentative situation - the audience. This book

fills that gap by studying audience reception to argumentation and the problems that come to light as a result of this shift in focus. Christopher W. Tindale advances the tacit theories of several earlier thinkers by addressing the central problems connected with audience considerations in argumentation, problems that earlier philosophical theories overlook or inadequately accommodate. The main tools employed in exploring the central issues are drawn from contemporary philosophical research on meaning, testimony, emotion and agency. These are then combined with some of the major insights of recent rhetorical work in argumentation to

advance our understanding of audiences and suggest avenues for further research.
