The human presence that animates the personal essay is surely one of

the most beguiling of literary phenomena, for it comes across in so familiar a voice that it 's easy to believe we are listening to the author rather than a textual stand-in. But the " person " in a personal essay is always a written construct, a fabricated character, its confessions and reminiscences as rehearsed as those of any novelist. In this first book-length study of the personal essay, Carl Klaus unpacks this made-up self and the manifold ways in which a wide range of essayists and essays have brought it to life. By reconceiving the most fundamental aspect of the personal

essay—the I of the essayist—Klaus demonstrates that this seemingly uncontrived form of writing is inherently problematic, not willfully devious but bordering upon the world of fiction. He develops this key idea by explaining how structure, style, and voice determine the nature of a persona and our perception of it in the works of such essayists as Michel de Montaigne, Charles Lamb, E. B. White, and Virginia Woolf. Realizing that this persona is shaped by the force of culture and the impress of personal experience, he explores the effects of both upon the point of view, content, and voice of such essayists as George Orwell, Nancy Mairs, Richard Rodriguez, and Alice Walker. Throughout, in full command of the history of the essay, he calls up numerous passages in which essayists themselves acknowledge the element of impersonation in their work, drawing upon the perspectives of Joan Didion,

Edward Hoagland, Joyce Carol Oates, Leslie Marmon Silko, Scott Russell Sanders, Annie Dillard, Vivian Gornick, Loren Eiseley, James Baldwin, and a host of other literary guides. Finally, adding yet another layer to the made-up self, Klaus succumbs to his addiction to the personal essay by placing some of the different selves that various essayists have called forth in him within the essays that he has crafted so carefully for this book. Making his way from one essay to the next with a persona variously learned, whimsical, and poignant, he enacts the palimpsest of ways in which the made-up self comes to life in the work of a single essayist. Thus over the course of this highly original, beautifully structured study, the personal essay is revealed to be more complex than many readers have supposed. With its lively analyses and illuminating examples, *The Made-Up Self* will speak to anyone who wishes to understand—or to write—personal

essays.

"Spurious Correlations ... is the most fun

---

you'll ever have with graphs." -- Bustle  
Military intelligence analyst and Harvard Law student Tyler Vigen illustrates the golden rule that "correlation does not equal causation" through hilarious graphs inspired by his viral website. Is there a correlation between Nic Cage films and swimming pool accidents? What about beef consumption and people getting struck by lightning? Absolutely not. But that hasn't stopped millions of people from going to tylervigen.com and asking, "Wait, what?" Vigen has designed software that scours enormous data sets to find unlikely statistical correlations. He began pulling the funniest ones for his website and has since gained millions of views, hundreds of thousands of likes, and tons of media coverage. Subversive and clever, *Spurious Correlations* is geek humor at its finest, nailing our obsession with data and conspiracy theory.

If you want to learn how to shoot a basketball, you begin by carefully observing someone who knows how to shoot a basketball. If you want to be a writer, you begin by carefully observing the work of accomplished writers. Recognizing the importance that modeling plays in the learning process, high

school English teacher Kelly Gallagher shares how he gets his students to stand next to and pay close attention to model writers, and how doing so elevates his students' writing abilities. *Write Like This* is built around a central premise: if students are to grow as writers, they need to read good writing, they need to study good writing, and, most important, they need to emulate good writers. In *Write Like This*, Kelly emphasizes real-world writing purposes, the kind of writing he wants his students to be doing twenty years from now. Each chapter focuses on a specific discourse: express and reflect, inform and explain, evaluate and judge, inquire and explore, analyze and interpret, and take a stand/propose a solution. In teaching these lessons, Kelly provides mentor texts (professional samples as well as models he has written in front of his students), student writing samples, and numerous assignments and strategies proven to elevate student writing. By helping teachers bring effective modeling practices into their classrooms, *Write Like This* enables students to become better adolescent writers. More important, the practices found in this book will help our students develop the writing skills they will need to become adult writers in the real world.

Why do writers write? In this candid and insightful essay, George Orwell reflects on the personal and political forces that shaped his work. Tracing his development from childhood ambition to fierce opposition against tyranny, he reveals the motivations behind his most famous books and the

moral urgency that drives all great writing. *Why I Write* is both a personal confession and a timeless meditation on the power of words. GEORGE ORWELL was born in India in 1903 and passed away in London in 1950. As a journalist, critic, and author, he was a sharp commentator on his era and its political conditions and consequences.

#### The Blitzkrieg Myth Wiley-Blackwell

A unique prison narrative that testifies to the power of books to transform a young man's life At the age of sixteen, R. Dwayne Betts—a good student from a lower- middle-class family—carjacked a man with a friend. He had never held a gun before, but within a matter of minutes he had committed six felonies. In Virginia, carjacking is a "certifiable" offense, meaning that Betts would be treated as an adult under state law. A bright young kid, he served his nine-year sentence as part of the adult population in some of the worst prisons in the state. *A Question of Freedom* chronicles Betts's years in prison, reflecting

back on his crime and looking ahead to how his experiences and the books he discovered while incarcerated would define him. Utterly alone, Betts confronts profound questions about violence, freedom, crime, race, and the justice system. Confined by cinder-block walls and barbed wire, he discovers the power of language through books, poetry, and his own pen. Above all, *A Question of Freedom* is about a quest for identity—one that guarantees Betts's survival in a hostile environment and that incorporates an understanding of how his own past led to the moment of his crime.

*Understanding and Evaluating Research: A Critical Guide* shows students how to be critical consumers of research and to appreciate the power of methodology as it shapes the research question, the use of theory in the study, the methods used, and how the outcomes are reported. The book starts with what it means to be a critical and uncritical reader of research, followed by a detailed chapter on methodology, and then proceeds to a discussion of each component of a research article as it is informed by the methodology. The book encourages readers to select an article from their discipline, learning along the way how to assess each component of the article and come to a judgment of its rigor or quality as a scholarly report.

Academic Writing, Real World Topics fills a void in the writing-across-the-curriculum textbook market. It draws together articles and essays of actual academic prose as opposed to journalism; it arranges material topically as opposed to by discipline or academic division; and it approaches topics from multiple disciplinary and critical perspectives. With extensive introductions, rhetorical instruction, and suggested additional resources accompanying each chapter, Academic Writing, Real World Topics introduces students to the kinds of research and writing that they will be expected to undertake throughout their college careers and beyond. Readings are drawn from various disciplines across the major divisions of the university and focus on issues of real import to students today, including such topics as living in a digital culture, learning from

games, learning in a digital age, living in a global culture, our post-human future, surviving economic crisis, and assessing armed global conflict. The book provides students with an introduction to the diversity, complexity and connectedness of writing in higher education today. Part I, a short Guide to Academic Writing, teaches rhetorical strategies and approaches to academic writing within and across the major divisions of the academy. For each writing strategy or essay element treated in the Guide, the authors provide examples from the reader, or from one of many resources included in each chapter's Suggested Additional Resources. Part II, Real World Topics, also refers extensively to the Guide. Thus, the Guide shows student writers how to employ scholarly writing practices as demonstrated by the readings, while the readings invite students to engage with scholarly content.

Many military tactics during World War II were based on the assumption that new technologies would lead to decisive battlefield victories, demoralization of the enemy by intensive bombing, or even a quick surrender. Political and military leaders, Allies and Axis alike, believed that “ blitzkrieg ” was the best way to victory. But in *The Blitzkrieg Myth*, John Mosier argues that this was not the case. Mosier examines the major European campaigns, including Germany ’ s invasion of Poland in the fall of 1939 and the fall of France in 1940, and demonstrates that they were, in fact, not blitzkrieg victories. Mosier asserts that new technologies clashed with the realities of conventional military tactics, and battle outcomes often depended on traditional warfare, in this bold reassessment of the military history of World War II. John Mosier is the author of *The Myth of the Great War*. He is a professor of English at Loyola University in New Orleans. His

background as a military historian dates from his role in developing an interdisciplinary curriculum for the study of the two World Wars, a program funded by the National Endowment for the Humanities. From 1989 to 1992, he edited the *New Orleans Review*.

Communication is a cornerstone of social interaction, and the study of communication and media has always moved across academic fields in the social sciences and humanities. Today it is a critical focus of study in cultural studies, business, organizational development, health, philosophy, international policy, literary criticism and psychology. *SAGE Benchmarks in Communication* is an exciting new series that will bring together the best of the best from across the disciplines — both classics and material previously difficult to access. *Social Media Studies* aims to bring together different approaches on social media studies, ranging from theoretical to empirical explorations. Through the mapping of this rapidly changing academic field, this Work is designed to reflect the intertwining relationship between social media studies and various disciplines, including

media and communication studies, sociology, anthropology, political science, economics and history. It also adopts global/regional perspectives to document the academic and cultural works on social media in different societies and countries. In fact, the internet has transcended both geographical and social boundaries so profoundly that it keeps meeting resistance in all kinds of social terrain, which has also inspired considerable research work.
